

about half a mile north-eastward of the gateway.

This drifter regulates inward-bound and outward-bound traffic. When no signals are exhibited by day or night by this drifter, inward-bound traffic may proceed to pass through the gateway.

Inward-bound vessels will be given priority over outward-bound vessels in respect of passage through the gateway.

To indicate that the gateway is clear for outward-bound vessels the drifter will display by day a black shape and by night two horizontal *white* lights.

During fog three long blasts on the steam-whistle, repeated at intervals of five minutes, will indicate that the gateway is clear for outward-bound traffic.

Vessels approaching Belfast lough in foggy weather should be careful to sound the regulation fog-signals, and to proceed with great caution when within a depth of 30 fathoms at all states of the tide.

When the gateway is clear for inward-bound traffic, no outward-bound vessel may approach within half a mile of the gateway; and when the signals indicate that outward-bound traffic may pass through the gateway, no inward-bound vessel may approach within half a mile of the gateway.

During the hours of darkness, all vessels entering or leaving must exhibit their side lights.

Before attempting to leave Belfast lough, outward-bound vessels must obtain instructions as to the route to be followed.

Authority.—The Lords Commissioners of the Admiralty.

By Command of their Lordships,

J. F. PARRY,

Hydrographer of the Navy.
