

1. The first part of the paper discusses the general theory of the subject. It is divided into two main sections: the first section deals with the general theory, and the second section deals with the special theory. The general theory is based on the principle of least action, and the special theory is based on the principle of least squares. The general theory is more general than the special theory, and it is more difficult to understand. The special theory is more specific than the general theory, and it is easier to understand. The general theory is more important than the special theory, and it is more useful in practice. The special theory is more important than the general theory, and it is more useful in practice.

2. The second part of the paper discusses the general theory of the subject. It is divided into two main sections: the first section deals with the general theory, and the second section deals with the special theory. The general theory is based on the principle of least action, and the special theory is based on the principle of least squares. The general theory is more general than the special theory, and it is more difficult to understand. The special theory is more specific than the general theory, and it is easier to understand. The general theory is more important than the special theory, and it is more useful in practice. The special theory is more important than the general theory, and it is more useful in practice.

3. The third part of the paper discusses the general theory of the subject. It is divided into two main sections: the first section deals with the general theory, and the second section deals with the special theory. The general theory is based on the principle of least action, and the special theory is based on the principle of least squares. The general theory is more general than the special theory, and it is more difficult to understand. The special theory is more specific than the general theory, and it is easier to understand. The general theory is more important than the special theory, and it is more useful in practice. The special theory is more important than the general theory, and it is more useful in practice.
