ORDER OF THE BOARD OF AGRICULTURE AND FISHERIES.

(DATED 3RD JUNE 1919.)

SHEEP DIPPING (BLACK MOUNTAIN DISTRICT) ORDER OF 1919.

The Board of Agriculture and Fisheries, by virtue and in exercise of the powers vested in them under the Diseases of Animals Acts, 1894 to 1914, and of every other power enabling them in this behalf, do order, and it is hereby ordered, as follows:—

Application of Part I of Sheep (Double Dipping) Order of 1914 with modifications.

1.—(1) Part I (*Restriction on Movement of Sheep out of a Movement Area*) of the Sheep (Double Dipping) Order of 1914 is hereby applied during the period commencing on the fifteenth day of July and terminating on the thirty-first day of August in each year to the Area described in the First Schedule hereto, which shall during such period be a Movement Area for the purposes of that Order, but subject to the modifications contained in this Article.

(2) The restrictions on movement of sheep applied by the said Order and this Order shall not apply to (i.) sheep moved through the Movement Area by road if they are not permitted to come in contact with other sheep during the movement through the Area; or (ii.) sheep moved out of the Area for the purpose of being dipped on premises outside the Area under and in accordance with the requirements of a Notice of an Inspector of the Local Authority served under Article 2 of this Order.

Double Dipping of all Sheep during period from 1st August to 31st August.

2.—(1.) All sheep—except those exempted by the applied provisions of Article 4 of the Sheep-Dipping (England and South Wales) Order of 1915 (hereinafter referred to as “the principal Order”) which are on any lands to which this Article applies at any time during any part of the period commencing on the fifteenth day of July and terminating on the thirty-first day of August, in any year, shall be caused to be dipped during that year by the owner or person in charge thereof twice during the period commencing on the first day of August and terminating on the thirty-first day of that month (herein referred to as “the prescribed dipping period”) by a thorough immersion in a sheep dip approved by the Board for sheep scab or purporting to be so approved, with an interval of not less than seven days between the dippings. Each dipping shall be carried out on such date, at such dipping place, and in such manner as shall be required by a Notice signed by an Inspector of the Local Authority of the District wherein the sheep are, and served by post, or otherwise, on the owner or person in charge of the sheep referred to in the Notice. Each dipping shall, where practicable, take place on lands to which this Article applies, out where such dipping is not practicable, the Notice may require the dipping to be carried out on other premises specified in the Notice, and may impose any conditions as to move-

ment, detention, isolation and dipping of the sheep which the Inspector may consider desirable and specify in the Notice. Sheep which are required by this Article to be dipped in any year shall be exempt from the general dipping in that year required by Article 3 of the principal Order.

(2.) If the owner or person in charge of sheep to which a Notice served under paragraph (1) of this Article relates fails to comply with any condition specified in such Notice he shall, according to his own acts and defaults, be deemed guilty of an offence against the Diseases of Animals Act, 1894.

(3.) Articles 3, 4 (iv.), 5 and 7 of the principal Order shall not apply to sheep affected by this Article, but otherwise that Order shall apply with the substitution of the prescribed dipping period for the prescribed dipping period therein specified.

(4.) This Article shall apply to the lands described in the Second Schedule hereto, and also to any lands in the neighbourhood to which it may be applied by a Notice to that effect signed by an Inspector of the Board or of the Local Authority and served upon the occupier of the lands described in such Notice.

(5.) This Article shall cease to apply to any lands upon service on the occupier thereof of a Notice to that effect signed by an Inspector of the Board.

(6.) A copy of every notice served under paragraph (4) of this Article by an Inspector of the Local Authority shall forthwith be sent to the Board by the Inspector signing the same.

Revocation.

3. The Sheep Dipping (Black Mountain District) Order of 1915 is hereby revoked.

ADMIRALTY NOTICE TO MARINERS.

No. 1019 of the year 1919.

WIRELESS DIRECTION FINDING STATIONS.

1. Wireless direction finding (D.F.) stations are stations set up ashore equipped with receiving apparatus which enables them to ascertain the direction from which wireless signals transmitted by another station emanate.

2. The accuracy with which bearings can be taken depends on the conditions outlined below; but, although in general the bearings taken by a station within the sector over which it is designed to work can generally be considered accurate to within two degrees, the administrations controlling these stations cannot accept any responsibility for the consequences of a bearing being inaccurate.

3. It is, however, pointed out that if at least three D.F. stations can be employed and if they are so situated as to give intersecting bearings, considerable reliance can be placed upon the result of 3 simultaneous bearings thus obtained, provided that the "triangle of error" (sometimes called the "cocked hat") formed by the intersection of the bearings is small.

4. In order to obtain the greatest possible degree of accuracy, it is important that the ship should not transmit with too much power. Signals should, however, be fairly strong and clear; great care must be taken to keep the note and strength steady, and to pay strict attention to spacing.

5. It must be borne in mind that it is impossible for the majority of existing D.F. stations to distinguish between a bearing and its reciprocal (*i.e.*, there is always a possible error of 180°), and that bearings are often unreliable at night and in very bad weather, also when the direction runs roughly parallel with the coast line.

6. The methods of asking for and giving bearings and the waves to be used will shortly be standardised by International agreement; and the particulars of the D.F. stations will eventually appear in the International list of Radiotelegraph stations. Meanwhile, each country is publishing regulations governing the use of its own D.F. stations as set out below.

7. It should be noted that there are two principal systems of D.F. stations at present in use, *viz.* :—

(a) Where each D.F. station is fitted with transmitting and receiving gear and works independently of others.

(b) Where several D.F. stations (all of them usually near a harbour entrance or difficult passage) are linked together by special land telegraph lines, being thus controlled by one station which alone is fitted with transmitting apparatus. The controlling station in such cases is not necessarily a D.F. station, but may be an ordinary coast station.

REGULATIONS FOR CANADIAN AND NEWFOUND-
LAND D.F. STATIONS.

8. The following independent D.F. stations are established:—

Station.	Call Signal.	Range (miles.)	Lat. N.	Long. W.
Chebucto Head	VAV	250	44 30 01	63 31 20
Canso ...	VAX	100	45 19 24	60 58 25
Cape Race ...	VAZ	250	46 39 10	53 05 05

9. These stations keep watch and take bearings on the 600-metre wave.

10. A ship requiring a bearing should call the D.F. station required, and transmit a government message requesting the bearing.

*Example:—*A ship S.S. "Nonsuch," call sign XYZ, calls up Chebucto Head in the ordinary way and, on receiving "K" (go on), makes the message as follows:—

"Call" S Radio Nonsuch 1, 5, 10 (day of month) 10.50 M (time)=Officer in charge Chebucto Head=Request bearing=Master+XYZ.

11. The D.F. station will then acknowledge receipt of the message and, if not ready to take the bearing at once, will direct the ship to wait.

12. When ready to take the bearing, the D.F. station will make "K" (go on), whereupon the ship will make the figure "2" 30 times, commencing with the "Call" and ending with the "Cross" and her own call signal.

13. If the D.F. station is not satisfied with the bearing, it will make the "repeat" sign (?) and the ship will again make the figure "2" as above, but only 20 times.

14. In default of such request for a repetition, the D.F. station does not transmit until it is ready to give the bearing. To do so, the station calls the ship and sends (as a government message) the TRUE bearing of the ship from the station in degrees from 0° to 359°, the angles being measured from true north (0°) clockwise through true east (90°), true south (180°), and true west (270°).

REGULATIONS FOR D.F. STATIONS IN THE
UNITED STATES.

15. The following independent D.F. stations are established:—

Station.	Call Signal.	Lat. N.	Long. W.
Cape Cod ...	NAE	42 02 58	70 04 32
Cape May ...	NSD	38 56 41	74 53 10

16. The above independent stations are available for use at ranges within 100 miles; and they keep watch and take bearings on 600 metres wave.

17. The controlled D.F. stations established are as follow:—

Controlling Station.		D.F. Stations Controlled.		
Name.	Call Signal.	Name.	Position.	
			Lat. N.	Long. W.
New York	NAH	Fire Is. ...	40 38 07	73 12 32
		Rockaway beach	40 33 52	73 52 40
		Sandy Hook	40 28 12	74 01 06
		Montoloking	40 01 30	74 03 10
Boston ...	NAD	Gloucester...	42 35 19	70 41 08
		Deer Is. ...	42 21 15	70 57 30
		Fourth Cliff	42 09 40	70 42 22

18. These stations are available for use at about 30 miles range from the harbour entrance. They keep watch and take bearings on the 600 metre wave.

19. The ship calls up the station or stations required and requests her bearing or position by means of the abbreviations shown below.

Signal.	Meaning.
QTE? ...	What is my true bearing?
QTE ...	Your true bearing is — degrees from — D.F. station.
QTF? ...	What is my position?
QTF ...	Your position is latitude —, longitude —.

20. The station will, if necessary, direct the ship to wait and, when ready for taking the bearing, will make "K" (go on).

21. The ship will then transmit:—

(i.) Her own call signal repeated for 30 seconds.

(ii.) A "dash" 5 seconds long.

(iii.) Her own call signal thrice.

(iv.) A "dash" 5 seconds long.

(v.) Her own call signal thrice, then a "dash," and so on for one complete minute (i.e., for 1½ minutes in all), finishing with "K" (go on).

22. The station then calls the ship, and makes "QTE" followed by the true bearing in degrees (0° to 359°) as in para. 14, and the name of the D.F. station which obtained the bearing, or else "QTF" and the position in latitude and longitude. All numbers will be spelt out in words.

23. The ship acknowledges receipt by repeating back, in figures, the bearing or bearings or the position as the case may be.

24. When working with independent stations ships should always ask for bearings. Controlling stations may be requested to give bearings or positions as the master may elect.

REGULATIONS FOR D.F. STATIONS IN THE
UNITED KINGDOM.

25. The following D.F. stations will be opened for use by merchant vessels on 1st June, 1919.

Station.	Call Signal.	Lat. N.	Long. W.
Peterhead (1) ...	BVL	57 33 30	1 49 05
Berwick (1) ...	BVG	55 41 48	1 53 40
Flamborough (1) ...	BVN	54 07 05	0 04 58
Amlwch (2) ...	BXV	53 24 28	4 18 20
Rhyl (2) ...	BZW	53 18 20	3 28 50
Lizard ...	BVY	49 59 07	5 12 18
Carnsore ...	BVJ	52 11 50	6 21 00
Larne ...	BXJ	54 51 15	5 48 15
Seaview (3) ...	BXK	55 22 00	7 19 25

NOTES.—(1) Peterhead, Berwick, and Flamborough are linked by a special land line enabling anyone to control the other two if required.

(2) Rhyl is not fitted with transmitting apparatus, and is controlled by Amlwch.

(3) Seaview is not fitted with transmitting apparatus, and is controlled by Malin Head (GMH), which keeps watch on 600 metres.

26. All the above D.F. stations keep watch and take bearings on the 450 metres wave (see note). Except as shown in the notes they all work as independent stations and can transmit, as well as receive, on 450 metres.

Note.—Ships with Marconi apparatus can adjust their transmitting gear very nearly to this wave (using reduced power) by cutting out half the primary transmitting condenser and adjusting the A.T.I. till the earth lamp shows maximum current in the aerial. The primary slider should be "all in."

27. The actual procedure to be adopted by ships requiring bearings will depend upon what stations are concerned. It should be observed that if the stations to be called do not all keep watch on the same wave (e.g., Malin Head and Larne), bearings should be asked for separately. If on the other hand the stations to be called all keep watch on the same wave (e.g., Lizard and Carnsore), they should be called up together and the bearings taken in one operation. If, however, two or more stations are linked by special land lines (e.g., Peterhead and Berwick), only one of them should be called up (i.e., the nearest of them which is fitted with transmitting apparatus). In such cases, however, the ship must specify in the preliminary signal the D.F. stations which are required to supply bearings.

28. The following abbreviations are to be used:—

Signal.	Meaning.
QTE? ...	"What is my true bearing from you (or from —)?"
QTE ...	"Your true bearing from me (or from —) was — degrees."

29. The ship calls the station or stations on the appropriate wave, making "QTE?" in conjunction, if necessary, with the call signals of the stations from which bearings are required and also (if the call is not made on

450 metres) by the figures "450," signifying that the ship will shift to 450 metres for the taking of the bearing. The ship then awaits instructions.

Example 1.

A ship whose call signal is XYZ requires bearings from Peterhead (BVL) and Berwick (BVG) and thinks that the latter is nearest.

The ship, having first shifted to 450 metres, calls Berwick thus:—

"Call" BVG BVG de XYZ QTE BVL BVG?

She then awaits instructions.

Example 2.

The ship requires a bearing from Seaview (BXK). The ship has to use 600 metres to call Malin Head (GMH).

She calls on 600 metres, thus:—

"Call" GMH GMH de XYZ QTE BXK? 450

She then gets ready to shift to 450 metres and awaits instructions.

30. The station or stations called then make the necessary arrangements and, when ready, answer in alphabetical order of their call signals (if more than one was originally called) and make "K" (go on) preceded by "450" if 450 had been made in the original call.

Example 1.

Berwick, in Example 1 above, warns Peterhead by land line and, when both are ready, makes on 450 metres:—

"Call" XYZ de BVG K

Example 2.

Malin Head, in Example 2 above, warns Seaview by land line and then makes on 600 metres:—

"Call" XYZ de GMH 450 K

Malin head then shifts to 450 metres so as to be ready to give the result when received by wire from Seaview.

31. On receiving "K," the ship, having shifted transmitting wave to 450 metres (if not already done), then makes her own call signal for 45 seconds and awaits the result.

Example 1.

The ship, in Example 1 above, makes on 450 metres:—

"Call" BVG de XYZ XYZ XYZ, &c.
(for 45 seconds) XYZ

Example 2.

The same as Example 1, reading GMH for BVG.

32. The station or stations then reply (in alphabetical order if more than one) either asking the ship to repeat (?) or giving the result. The result is given by the signal QTE followed as necessary by the call signal and by a group of three figures (000 to 359) indicating the true bearing from 0° to 359°, reckoned as in paragraph 14, of the ship from the station. Several bearings can be combined into one message, each bearing immediately following the call signal of the station which took it. The time of handing in is always expressed in Greenwich mean time for all messages giving bearings to merchant ships.

Example 1.

Peterhead, in Example 1 above, is not satisfied with the bearing and informs Berwick. Berwick makes on 450 metres:—

“Call” XYZ de BVG?

The ship at once complies by making on 450 metres:—

“Call” BVG de XYZ XYZ XYZ, &c.
(for 45 seconds) XYZ

Peterhead is then satisfied that the bearing is 130° and informs Berwick, while Berwick finds that its own result is 37°. Berwick therefore makes 450 metres:—

“Call” XYZ XYZ de BVG 1 9.45 M
(time) = QTE BVL 130 BVG 037 + BVG

Example 2.

Seaview, in Example 2 above, gets a satisfactory bearing of 329° and informs Malin Head. The latter makes on 450 metres:—

“Call” XYZ XYZ de GMH 2 10.46 S
(time) = QTE BXX 329 + GMH

Example 3.

Had the ship merely asked Lizard (BVY) for a bearing, Lizard, finding it to be 246°, would make on 450 metres:—

“Call” XYZ XYZ de BVY 1 7.6 M
(time) = QTE 246 + BVY.

33. The ship, on receiving the result, acknowledges receipt in the ordinary way, and makes the “end of work” sign. This sign is then repeated by the station or stations concerned. It is important that the “end of work” sign should not be omitted, since it not only indicates that the operation is finished, but it also shows that all concerned are about to resume watch on their normal wave.
