JOHN NICHOLAS.

Tarin, June 18. N. S. The French remain in their Comp near Revolva without attempting anything; From whence Marelchai Gazinat has fent a Geond Letter to the Marquis de St. Thomas, the Duke of Savoj's Secretary of State, with new Gonditions of Peace; Who has again andweed him, That his Royal Highness will communicate his Proposals to the Princes his Allies, being resolved not to Treat without them; We have almost finished the Works that cover this City, which are very good, and have raised Batteries in several places where they are most useful, and our Troops are so well posted, that we are in ratear either for this place or Cour. Our Parties do very much annoy the Enemy, and two days ago some of our Troops attack'd another of their Guards, killed several, and brought away the rest Prisoners; 'Tis certain they suffer very much by the scarcity of Provisions, and that their Army is much weakerded as well by Desertion and Sickness, as by the Peasans, who kill all the Stragling Soldiers they meet with; and if they stay much longer

where they now are, they may find it very difficult to make a good Remear.

Vicana, June 20. The Imperial Army was, by our last Advices, encamped near Segedin, and several Bridges were laid over the Theyse, in order to their passing that River; We believe they are by this time before Teneswaer, the Resolution being taken to Besiege that place; For which purpose a great Train of Artillery is sent to the Army; We have yet no News of the Grand Signior's being set out from Adrianople, nor of the Enemy's having any Body of Troops together near our Frontiers, so that we hope to effect our Design, before they can be in a posture to give us any Disturbance in it. General Caprara arrived the 14th Instant at Pest, in his way to the Army. General Truchses commands a stying Camp near Peter-Waradin; and General Rabutin another in Transstvania. The Emperor's Galleys and other Vessels commanded by the Sieur Asenberg, are ordered to cover the Provisions that are sent by Water to Titul, and other Places on the Theyse, from whence they may be most conveniently conveyed by Land to the Army. The Saxon Forces that arrived here some days ago, went on yesterday towards Humaars.

went on yesterday towards Hungary.

Francsort, June 27. The French Army is come to Woldorss, about 3 Leagues from Hydelberg, and we hear the Mareschal de Choiseul has sent for the Copper Boats that are at Philipsbourg. Prince Lewis (whose Army is reinsorced by the Bavarian and other Troops) is in all probability now on his march towards them, for the last Letters from his Camp at Steppach said, Orders were given out for that purpose; and 'tis believed that upon the approach of the Allies the French will repass the Rhine; 'Tis said, they have sent a small Detachement to join the Marquis de Harcourt on the Mosselle, who as they give out, is to invest Rhinselt; but we are under no apprehensions for that place, it being very well provided, and ready to receive

Hamburgh, June 29. The Letters from Warsaw give an account, that the Senate had met upon the death of the King of Poland, and that they were preparing things in the usual manner for a new Election.

Paris, June 29. The Affairs of Savoy have been of late the great Subject of Discourse here, and much talk there has been of a Paris that were fide to be Normalization.

Paris, June 29. The Affairs of Savoy have been of late the great Subject of Discourse here, and much talk there has been of a Parce that was sid to be Negotiating with that Prince, but the hopes we had of it lessen every day, his Royal Highness not being to be prevailed upon, either by Threats or Promises, to engage in any separate Treaty; In the mean time the Mareschal de Catinat is not, it seems, in a condition to attempt any thing, for we may be consident be would not be thus quiet, it he saw any probability of success. A Letter from Pignerol of the 20th Instant gives the following Account. The French Army
