Venice, Sept. 12. N. S.

THE Senate have appointed Signior Molino, who was formerly Generalissimo of the Forces of this Republick, and Signior Razzini, at present their Ambassador at the Emperor's Court, to be their Commissioners and Plenipotentiaries for the Treaty of Peace with the Turks, wherein they are to be assisted by Signior Nicolosi, one of their Secretaries, who is already gone to Vienna, and Signior Molino will follow in a few days in Company of Signior Loredano, who is to succeed in the Embassy at that Court. Several Recruits are arriv'd at the Lido, in order to embark on the Convoy which is preparing here for the Levant. We expect with impatience to hear from our Fleet, having for some time had no other Advices concerning them, than by a Vessel come in here this week from Smirna, the Master whereof says, That when he sailed from thence, they were cruising near the Island of Stanchio in the Archipelago; and that the Ships from Barbary, after having been several days at the Isle of Facchi, were gone to join the Ottoman Fleet, who 'twas believed would, as soon as they had received this Reinforcement, come out of the Dardanelles; so that we may shortly hear of some Action on that side. We have Letters from Dalmatia of the 28th of August, which say, That the Bassa of Bosnia had appeared with a strong Body of the Enemy's Troops on the Frontiers of Croatia, upon which the Proveditor Marcello had assembled the Venetian Forces in those Parts, and intended to march to Mantchi to observe the Enemy.

Turin, Sept. 6. The Duke of Savoy went from hence last Thursday for Mondovi; and after having made a short stay there, he intends to go and visit the Garison of Pignerol. Orders are given for repairing our Citadel, which received great Damage by the blowing up of the Magazine that was set on fire by Lightning some Weeks ago, and divers Workmen have been sent for from several of the neighbouring Cities, to be employ'd therein.

Lemberg, Sept. 4. The King of Poland designs in a few days to go from hence to Halitz, where most of his German Forces (which, when all join'd together, will consist in 30000 Men,) are already arriv'd. The Army of the Crown continues in the mean time encamped near Monasterack. We hear, the Garison of Caminiec make frequent Excursions on our Frontiers, notwithstanding they have often been re-ull'd with Loss by our Forces which are posted in those Parts. The Queen-Dowager, with Prince Constantine her Son, have taken Leave of the King, and are gone to Javarow, in order to set out from thence on their Journey to Rome. Prince Alexander, who was lately made Captain of the King's Guards, continues here, and will attend him during the Campaigne.

Vienna, Sept. 13. The Court continues at Ebersdorf. But their Imperial Majesties intend to come hither to morrow, to assist at the Celebration of the Anniversary Feast for the Deliverance of this City from the Siege in the year 1683, and the next day they will return to Ebersdorf. The Emperor's Plenipotentiaries for the Peace with the Turks, are preparing their Equipages in order to their Journey to the Frontiers, which they will begin in a few days; and in the mean while they have frequent Conferences with the Emperor's Ministers, and with those of the Republick of Venice and the Czar of Muscovy, concerning the Matters they are to Treat of. A farther Supply of Ammunitions was sent some days ago down the Danube for the Service of our Army in Hungary, and Magazines are provided on the Frontiers of Transilvania and Upper Hungary, to supply them from time to time with Provisions and Ammunition during their stay on that side the Danube. Our last Advices from the Army say, That the Bridges over the Theysse being ready, they passed that River the 3d Instant, and encamped over-against Titul, and the Artillery and Baggage followed the next day. Prince Eugene, who commands them, had posted Lieutenant-Colonel Nicubourg and the Count of Thierheim with a Party of 600 Men on each side the Bridge over the Morass of Pillowar, as well for the Security of that Pass, as to maintain the Communication with Peter-Wradin. General Spilberg was left with a Regiment near Titul, and had Orders to build some Redoubts to cover that place, and they were making a Fort likewise to secure their Bridge over the Theysse; Prince Eugene had sent the Quartermasters-General Cref-tien and Conry to mark out a Camp near Bergskerk, intending to march thither in 2 or 3 days. They had been some days without any certain Advices of the Motion of the Enemy, several Parties which were sent out to make Prisoners, and to get Intelligence, not being yet returned; but it's believed, they are still encamped near Semendria. The Turkish Fleet on the Danube continues near Belgrade.

Fraucfort, Sept. 21. The Elector Palatine is expected here next week from Weynheim, and great Preparations are making for his Reception. He intends in his way hither to make a Visit to the Landgrave of Hesse Darmstadt, and having passed some days here, to go and view that part of his Territories which is situate along the Rhine. His Electoral Highness has given Directions for making some Fortifications at Mannheim. The Elector of Mentz is gone from Mentz to Aschaffenburg.

Hamburg, Sept. 23. The Exportation of Corn has been forbid here, by reason of the like Prohibition in Denmark, the Country of Lunenburg, and other Neighbouring Parts. We hear from Caralserson, That the King of Sweden, with the Queen-Mother and the rest of the Court,

were
