by the Board furnish to the Board within the period specified in the notice, a statement in writing giving any information which the Board may require for that purpose, and any Owner who claims that a special addition or a revision under Clause 55 or an adjustment under Clause 56 of the Scheme should be made, as the case may be, shall with such statement furnish to the Board a notice in writing stating the addition or revised or adjusted annual basic tonnage which he claims, together with any evidence required to substantiate the claim.

58.—(1) Within seven days of the date of the notice of any determination of the annual basic tonnage of his coal mine the Owner shall give notice in writing to the Board specifying the proportion of such tonnage which he desires to be allocated to each month and subject to the approval of the Board such allocations shall be the monthly basic tonnages of that coal mine. In default of such notice or if the Board do not approve the proportions specified in such notice the Board may divide such annual tonnage into monthly tonnages in such proportions as may be fair and equitable. The Board may from time to time revise such monthy tonnages where it is fair and equitable to do so.

(2) Notice of any monthy basic tonnage determined under this Clause shall forthwith be given to the Owner.

Permits.

59.—(1) The supply by Owners of coal from their coal mines shall be regulated by the issue of Permits by the Sales Control Committee.

The Committee may issue—

(a) a Special Permit for the supply of coal in pursuance of an enquiry made therefor, or

(b) a General Permit for the supply of coal in circumstances such that in the opinion of the Committee it is unnecessary, in order to avoid competition between Owners, that a Special Permit should be issued in respect of each enquiry for coal.

(2) Every Permit shall state:—

(a) the name of the Owner to whom it is issued;

(b) the maximum tonnage of coal, and the commercial description of coal, which may be supplied thereunder;

(c) the price below which the coal shall not be supplied, or the actual price at which the coal may be supplied, and the maximum discount, commission, or credit, which may be allowed by the Owner;

(d) the period within which the coal may be supplied, and any limitation upon the tonnages which may be supplied during any part of such period; and

(e) any special conditions of sale.

(3) In addition—

(a) every Special Permit shall state the name of the customer to whom the coal may be supplied; and

(b) every General Permit shall state the class of customer to whom, or the markets in which, the coal may be supplied, and the maximum tonnage of coal which may be supplied to any customer in respect of any one sale or agreement for sale. No such tonnage shall exceed 40 tons.

(4) Any Permit for the supply of coal for resale by the customer may state:—

(a) the market or area in which the coal may be resold; and

(b) the price below which the coal may not be resold, and the maximum discount, commission, or credit, which may be allowed by the customer.

It shall be a term of the Permit that coal shall be supplied by the Owner thereunder only if the customer agrees to observe such conditions.

(5) No Owner shall supply coal from his coal mine otherwise than under and in accordance with the terms of a Permit issued to him:

Provided that an Owner may supply coal without a Permit:—

(a) for use in working his coal mine;

(b) free or at reduced rates for the use of persons who are or have been employed in or about the coal mine and the dependants of persons who have been so employed; and

(c) to the lessor of the coal mine or his nominee in accordance with the terms of the lease.

60.—(1) Permits may be issued upon an application therefor by an Owner or otherwise.

(2) Any Owner, who receives an enquiry for the supply of coal from his coal mine (other than an enquiry for coal which he is permitted and intends to supply under a General Permit or without a Permit), shall forthwith inform the Sales Control Committee thereof, stating by whom the coal is required, and giving particulars of the quantity and description of coal and the date for delivery thereof, and any other particulars which may be required by the Committee, and may make application for a Special Permit for the supply of the whole or part of the coal.

(3) The Sales Control Committee may issue to the Owner who received the enquiry or to any other Owner a Special Permit for the supply of the whole or any part of the coal, or may issue a Special Permit where no enquiry has been submitted by an Owner.

(4) An Owner who has received a Special Permit shall as soon as may be give to the Sales Control Committee particulars of any agreement entered into by him for the supply of coal under that Permit.

(5) Permits shall not be issued for the supply of coal in such a manner that in any period for which allocations are fixed the tonnage of coal supplied by Owners under Permits exceeds any allocation in respect thereof.

(6) On or before the 1st day of August, 1936, each Owner shall give to the Sales Control Committee particulars of all agreements made before the 1st day of August, 1936, under which coal from his coal mine is to be supplied after that date (other than agreements in respect of which no Permit is required), and the Committee shall issue a
