17th May, 1949.

The Lords Commissioners of His Majesty's Treasury hereby give notice that, at a Trial of the Pyx begun at Goldsmiths' Hall in the City of London

on the 9th day of March and concluded on the 5th day of May, 1949, the following Verdict of the Pyx Jury was delivered to the King's Remembrancer, viz.:—

## TRIAL OF THE PYX OF THE LONDON MINT.

### VERDICT.

We, whose names are hereunder written, having been sworn on the 9th day of March, 1949 before the King's Remembrancer at Goldsmiths' Hall in the City of London made the following assays and trial of His Majesty's coins in the pyx of the Royal Mint in London, which according to accounts produced by officers of the Mint were coined in the said Mint from the 1st day of January 1948 to the 31st day of December 1948 both dates inclusive.

1 We ascertained the number of coins in each packet produced to us and that such number corresponded with the number which the officers of the Mint represented the packet to contain.

2. We found no gold coins in the said pyx.

3.—(a) We found that the silver coins therein weighed in all not more than twelve ounces troy.

(b) We weighed in bulk such silver coins and we ascertained that they were on the whole within the variation from the standard weight allowed under the Coinage Acts 1870 to 1946 (hereinafter called "the Acts") being one thousandth part of an ounce (+ 0.001) above the standard weight prescribed by the Acts.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade and we found that the amount of variation from the standard fineness or composition prescribed by the Acts was plus three hundredth parts of one per centum (+ 0.03 per cent.) on the whole of the silver coins assayed and therefore within the variation from fineness or composition allowed under the Acts.

4.—(a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at its standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation from the said standard weight was the amount recorded in respect thereof in the schedule hereto, and that each twelve ounces troy (at its standard weight) was therefore within the variation from the said standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the amounts of variation from the standard fineness or composition prescribed by the Acts were minus one tenth of one per centum (− 0.1 per cent.) of copper and minus one fifth of one per centum (− 0.2 per cent.) of nickel on the whole of the cupro-nickel coins assayed, and therefore

within the variation from fineness or composition allowed under the Acts.

(d) We weighed in bulk the residue of the coins remaining in the packet of cupro-nickel coins and we ascertained that they were on the whole within the variation from the said standard weight allowed under the Acts, being one ounce and eight hundred and thirty one thousandth parts of an ounce (- 1.831) below the standard weight prescribed by the Acts.

Dated the 5th day of May, 1949.

#### THE SCHEDULE.

One weighing of twelve ounces troy showed no variation from the said standard weight, eleven such weighings showed variations of eight, three, one, four, four, three, two, two, five, three and eight thousandth parts of an ounce (+ 0.008, + 0.003, + 0.001, + 0.004, + 0.004, + 0.003, + 0.002, + 0.002, + 0.005, + 0.003 and + 0.008) respectively above the said standard weight: and twenty such weighings showed variations of four, four, eight, one, four, six, twelve, three, one, twelve, one, three, fourteen, six, four, six, three, four, three and six thousandth parts of an ounce (- 0.004, - 0.004, - 0.008, - 0.001, - 0.004, - 0.006, - 0.012, - 0.003, - 0.001, - 0.012, - 0.001, - 0.003, - 0.014, - 0.006, - 0.004, - 0.006, - 0.003, - 0.004, - 0.003, and - 0.006) respectively below the said standard weight.
