Falmouth, September 6.

A Small Vessel from Ireland tells us, that the *Susan* and *Anne* a vessel returning from the *Barbados*, sprang so great a Leak that in little time she sunk to the bottom, the Captain and 14 men perishing with the ship, but they had the good fortune to make their escape in their Boat, and got safe to land at *Kinsale*.

Here are now in Port near 60 sail of ships bound for *France* and the *Streights*, of which, several of them put to sea the last week, but were by contrary winds blown back again.

Lisbonne, Sept. 10. Many changes have been lately made here among the great Officers, the *Marquis de Niçz* after three years employment as Lieutenant of the Treasury, is removed from that Charge and succeeded by the *Comte de Torres*. The *Viz Counte de Ponte Lima* removed from his employment near the King, which by his absence is judged useless, and from his Office of President of the Council of Trade, and *Don Francisco Baretto* placed in his room; the *Comte de Aueras* is made President of the *Meza da Consórtia*; and the *Comte de Villar* Mayor Rigidor; the two *Marquesses de Marialva* and *de Gonca* with the *Comte de San Lorenzo* discharged from the Council of dispatches, by virtue of a Decree that now having Charge in any inferior Tribunal shall have a Vote in that Council, but the *Marquis de Marialva* is succeeded by his Brother *Don Rodrigo*.

The French Ambassador has at last obtained leave at the Court for setting up a Magazine of stores for the French men of War, but with some restrictions wherewith he is not yet satisfied; he has much pressed for a Grant of free Commerce to the *Indies*, but has obtained only a Letter to the Viceroy of those parts to afford their ships succor in case of necessity.

The Sally men of war continue as yet their interruption of Trade, but is believed will in little time be restrained from their courses; one of them a small Pink of four Guns was forced on shoar by Captain *Holmes*, and afterwards brought off and carried into *Cadix*, but the men made their escape.

Legorn, Septemb 23. On Wednesday last the Great Dutchers returned to *Florence* from the *Baths of Lucca*, and was at her arrival saluted by all the Guns from the two Forts.

A ship lately arriving from *Malta* tells us that the City of *Candia* still defends its self with much courage, and that the Defenders are plying their Works at their Retrenchments whereon they have planted many Guns, and were endeavouring to fill the great Arsenal with Barre, whereon to raise a great Battery to defend their Port, against which the Enemy began to apply their forces; farther saying, that though the French Auxiliaries were returned home, they had so much strength and courage left them, as to believe they might preserve the place this winter from the Enemy.

From *Malta* they write, that on the 10th past the Council there assembled, made choice of the Count *Adam Ursulaus*, Grand Prior of *Bohemia*, and one of the Fraternity of the Order to be sent to *Rome* with the Character of Ambassador of obedience from the Great Master, and may begin his voyage before the end of September, being also instructed from *Venice* for a Conference with the Pope about the farther defence of the Kingdom of *Candia*.

They farther say, that about 10 of the men of war of *Algiers* that have been employ'd in the Grand Segnors service, and were returning homewards, have on their way made some stay about the Channel of *Malta*, and had seized on two Tartans, but the men belonging to them, escaped to Land in their Boats, but that two Brigantines armed out from *Sardinia* were arriv'd at *Malta*, bringing in with them a Prize laden with Provisions, and about 12 Moors prisoners.

Genoa, Sept. 28. The Gallies of this Republick being abroad, have taken a Bark of *Algiers*, having on board 45 Turks and Moors, who made about an hour stout resistance.

Two Regiments of German Foot which were lately dismissed the Spanish service by the Governour of *Milan*, are said to have fallen into the Principality of *Ceretto*, (which being a Fief of the Empire lately put it self under the French Protection) and have burnt and plunder'd many Villages, and wholly destroyed the Castle.

A Courier lately arriving here from *Spain* in his way for *Rome* informs us, that the Dutch Ambassador, the Baron *de Rede* after some weeks distemper is lately deceased, but before his death made open profession of the Roman Catholick Religion, to which he was long before supposed to have had an inclination.

He farther informs, that a Cabinet of Papers of private and great concernment, was lately taken out of the Catholick Kings Chamber, for which diligent search and enquiry has been made but in vain.

Vienna, Sept. 29. The Court continues yet at *Ebersdorf*, where the principal Lords and great persons have of late exercised themselves in shooting for Prizes.

On Thursday last after a great Feast, the Prizes being agreed on, the First was won by the Count *de Kevenhiller*, the Second by the Emperour, and the Third by *Charles* Prince of *Lorraine*, who has proposed other Prizes which are to be contended for the next Tuesday.

The 22 of this Month arrived here a Courier Extraordinary from *Spain* with a Coller of the Order of the *Golden Fleece* which is to be sent to the King of *Polsand*, and the Count *d'Harach* has received a Commission from His Imperial Majesty to invest the said King with that Order, who accordingly went away Post for *Cracoviz*, where he designs to attend the King at his Coronation.

From *Larissa* Letters of the 18th past inform us, that notwithstanding all the reports and probabilities of the Duke de *caufors* survival of the unhappy Sally made from the City of *Candia*, his Head was amongst several others presented to the Grand Segnior, and known by some French which were there.

From *Hungary* we are told, that some actions frequently pass between the *Hussars* and the *Turks*, and particularly, that a party of about 200 *Hussars* having intelligence that a party of *Turks* were abroad upon the *Eronas*, marched out with intention to engage them, but the *Turks* upon their approach began to consult their own security and to get away through some enclosures; the *Hussars* intent upon their prey, left their Horses to the Guard of four only of their number at a stack of Hay, and on foot pursued the Chace, during whose absence, a party of one hundred *familars* seized the Horses with their Guard, in revenge of this affront, the *Hussars* drawing together a more considerable strength, marched off towards *Waradin*, and meeting with a party of about Four hundred *Turks* of the Garrison, engaged and routed them, killing a great part

of them upon the place, and throwing those they took into the River.

Heidelberg, Octob. 4. The 28th past, Prince Ferdinand of Baden, eldest son to the President of the Chamber of Spire, at a great Hunting with many of the neighbour Princes at *Eslinguen*, himself, with the Prince Elector Palatine and his son being in a Chariot made for that recreation, their diversion was interrupted by a sudden misfortune, for Prince Ferdinand having his hand upon the Muzzle of his Gun, the Cock unexpectedly went down and shot him through the hand, upon which accident, the Chirurgeons were immediately sent for, some of whom advised the cutting off of his Arm, but much care being taken of him, they hoped he's now past all danger.

Brussels, Octob. 11. On Saturday last the body of 9000 French which had been drawn out of their Garrisons for the Convoing of 800 Waggon's laden with Coals, and a considerable summe of Moneys for the carrying on of their fortifications, having secured their Charges, broke up their Body and returned to their respective Garrisons, only a considerable party of them were left at *St. Amant* and are to pass to *Lille* and *Tourney* by water, since this, their Works advance with all imaginable diligence, most of the Citadels which are raising in the late Conquest, will before *Albion* be made defensible, and finally by *Christmas*: they are in all parts preparing necessaries for the War, and filling their Magazines with Ammunition of all sorts; they have also much strengthened *Arras*, *Landrevy*, and *Quefroy*, and are raising men, not only about those, but in several other parts of *France*.

A Report has been spread up and down the Provinces of a design of some overtures for an exchange to be made to *Spain*, in lieu of these Provinces; but this being ill founded, and carrying with it a consequence of ill consequence, the Constable of *Castille* has published a severe Placard against the Publishers and Propagators of this and the like reports.

The four Members of *Flanders* are upon the Constables desire attending here his Excellencies pleasure, but have not yet been admitted to their Audiences, nor is any thing resolved on as to the certain summe which that Province shall pay for the maintenance of the forces or the fortifications of *Brux*.

The Commissioners from *Liege* have to some prevailed with the Constable of *Castille*, that somewhat either is already or will be speedily resolved on as to that affair, which tis believed will be done with much moderation, but the Grand Provost of *St. Lambert* is again to be first conferred with, and tis said the Part or Method of the Imposts and Customes may be suspended as to the Subjects of *Liege*.

Four Spanish soldiers which robbed the *Cher* Coaches and killed a Cornet, were so closely pursued by his Relations, that they were apprehended, and have since been sentenced by Count *Martin* Camp-master General, to be broken upon the Wheel; but upon application made to the Constable of *Castille*, the rigor of the Sentence is to be abated, and this day they are ordered to be hanged at the place where they committed the Fact.

At yet no further resolution is taken about the reformation of our forces which has so long been talked of. Don *Francisco* *Madro* de *Velasco*, and Don *Ansueto* de *Mederana* are lately made Commissary-Generals of the Cavalry in the room of Don *Diego* de *Castro*, and Don *Diego* de *Alcona*.

Here is with much curiosity preparing a Train of Artillery of 24 Brass Cannon, a Mortar-piece, many Waggon's, to be drawn by little Horses, and 8 Bridges, all of them in little, which are to be sent into *Spain* for the instruction and diversion of the young King, who is even beyond his age much delighted in all Military Arts and Exercises.

The Magistrates of *Hall* after a long Process against the Jesuits who refused to give instruction to their youth, having brought their suit near an issue, in which they were

in great probability to succeed, the Jesuits have thought fit of their own accord to open their Colledge only to admit the Youth, rather then to attend the success of the Process.

They have also strongly opposed the Recollects in a design they had to introduce 25 persons more into their number, who should employ their studies in Divinity, but the Magistrates have endeavoured to prevent them, the whole Order living upon Alms, and being likely upon this accession to encrease the burden which already lies weighty enough upon the people.

Tangier, Sept. 5. His Excellency the Lord Henry Howard having sent Mr. *Karren*, the Secretary of the Embassy to *Sally* to take an account of what was ordered by the Emperour of *Morocco* for his safe passage and Reception; he arrived accordingly at *Sally* the 17th past, where with the persons attending him, he was treated with much kindness, and entertained with great civility by the Command and upon the request of the Emperour, and from whence he immediately dispatched away some persons who were most versed in the Customs and Language of that Countrey to attend the Emperour, so know his farther pleasure as to the place and manner of the Lord Ambassadors reception. The Alcalid of *Sally* being also pleased to give them addresses to the principal and most favoured persons of the Court: from thence as also from *Tetuan* we are informed, that the Emperour has lately had great success in the Conquest of his Emire, and has taken three considerable Castles which are in the Mountains above *Marrakech*, putting most of the people to the sword, and is still remaining with a numerous Army, most of them *Moroc* near *Marrakech*, and has ordered a Bridge to be made over the River of *Asimora*, which divides that Kingdom from *Fez*, for the more convenient passage of his Army and the perfecting the Conquest of that Kingdom.

One of the Towns of his late Conquest, holding out with greater obstinacy then was expected, the Emperour himself alighted from his Horse resolving to lead up his Foot to storm, but his Officers strongly dissuading him from so dangerous an exploit of his persons with much reluctance he suffered his Brother to take his place, who won the Town, though with great slaughter of his men, and many hurts received in his own body, and was carried off to *Fez*, in Order to whole Cure, the Governour of *Alban* having lately hither to desire that an able Physician, might be sent from hence to take the care of him, which was readily comply'd with by the Deputy Governour, and one Mr. *Farraday* an able Chyrurgeon was sent to *Tetuan*, and is from thence by the Governour of that place to be specially conveyed to *Fez*. About the 22 past, arrived in *Sallee* Road two Dutch men of War with a Gallies Hoys, having on board them a Consul, who desired access to the Emperour, but was refused by the Alcalid till he first knew the Emperours pleasure.
