22nd May 1959.

The Lords Commissioners of Her Majesty's Treasury hereby give notice, that, at a Trial of the Pyx begun at Goldsmiths' Hall in the city of London on 24th February and concluded on the 13th May 1959, the following Verdict of the Pyx Jury was delivered to the Queen's Remembrancer, viz.:

WE, whose names are hereunder written, having been sworn on the 24th day of February 1959 before

the Queen's Remembrancer at Goldsmiths' Hall in the city of London, made the following assays and trials of Her Majesty's coins which, according to accounts produced by the officers of the Royal Mint in London, were coined in the said Mint from the 1st day of January 1958 to the 31st day of December 1958, both dates inclusive, in accordance with the Coinage Acts 1870 to 1946 (hereinafter called "the Acts") and were set aside and placed in the pyx of the said Mint as prescribed by regulations made under the Acts.

1. We ascertained the number of coins in each packet produced to us and that such number corresponded with the number which the officers of the Mint represented the packet to contain.

2. (a) From each of the eighty-seven packets of gold coins we took one sovereign amounting altogether to eighty-seven sovereigns.

(b) We weighed separately each of the said sovereigns so taken and we ascertained that it was within the variation allowed under the Acts from the standard weight thereby prescribed and we found that such sovereigns were on the whole within such variation, being two thousandths parts of an ounce (+0.002) above standard weight.

(c) We then melted such sovereigns into an ingot and assayed such ingot comparing it with the standard trial plate of gold produced by the Board of Trade, and we found that such ingot was within the variation allowed under the Acts from the standard fineness thereby prescribed, the amount of variation from standard fineness being minus twelve hundred thousandths parts (-0.0012).

(d) We weighed in bulk the residue of the coins so remaining in the packets of gold coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being two hundred and twenty-six thousandths parts of an ounce (+0.226) above standard weight.

(e) We then took from such residue six sovereigns and weighed and assayed them separately, and we found that such sovereigns weighed respectively the first 123.266 grains, the second 123.350 grains, the third 123.267 grains, the fourth 123.288 grains, the fifth 123.190 grains and the sixth 123.258 grains, and that therefore the first of such sovereigns was eight thousandths parts of a grain (-0.008) below, the second seventy-six thousandths parts of a grain (+0.076) above, the third seven thousandths parts of a grain (-0.007) below, the fourth fourteen thousandths parts of a grain (+0.014) above, the fifth eighty-four thousandths parts of a grain (-0.084) below and the sixth sixteen thousandths parts of a grain (-0.016) below standard weight.

(f) We then assayed separately the last mentioned sovereigns and we found the millesimal fine-

ness of such sovereigns respectively to be, the first, 916.48, the second 916.75, the third 916.94, the fourth 916.65, the fifth 916.64 and the sixth 916.63, and that therefore the first of such sovereigns was eighteen hundred-thousandth parts (-0.00018) below, the second nine hundred-thousandths parts (+0.00009) above, the third twenty-eight hundred-thousandth parts (+0.00028) above, the fourth one hundred-thousandth part (-0.00001) below, the fifth two hundred-thousandth parts (-0.00002) below and the sixth three hundred-thousandth parts (-0.00003) below standard fineness.

3. (a) We found that the silver coins in the said pyx weighed in all not more than twelve ounces troy.

(b) we weighed in bulk such silver coins and we ascertained that they were on the whole within the variation allowed under the Acts from the standard weight thereby prescribed, being one thousandth part of an ounce (+0.001) above standard weight.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade, and we found that they were on the whole within the variation allowed under the Acts from the standard fineness thereby prescribed, the amount of variation from standard fineness being plus two ten-thousandth parts (+0.0002).

4. (a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation from standard weight was the amount recorded in respect thereof in the schedule hereto, and that each twelve ounces troy was therefore within the variation from standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the coins assayed were on the whole within the variation allowed under the Acts from the standard composition thereby prescribed, the amounts of variation from standard composition being minus one tenth of one per centum (-0.1%) of copper and minus one tenth of one per centum (-0.1%) of nickel.

(d) We weighed in bulk the residue of the coins remaining in the packets of cupro-nickel coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being eight ounces and six hundred and forty-nine thousandth parts of an ounce (+8.649) above standard weight.

Dated the 13th day of May 1959.

#### THE SCHEDULE

Nine weighings of twelve ounces troy showed variations of two, three, four, seven, seven, ten, ten, eleven and fifteen thousandth parts of an ounce (+0.002, +0.003, +0.004, +0.007, +0.007, +0.010, +0.010, +0.011 and +0.015) respectively above standard weight.
