### TREASURY

Treasury Chambers,  
Great George Street,  
London S.W.1.

14th May 1964.

#### RATES OF INTEREST ON LOANS FROM THE LOCAL LOANS FUND NOTICE

The Treasury hereby give notice that, in pursuance of the powers conferred on them by the Public Works Loans Act 1964, the following rates of interest shall be charged on loans made out of the Local Loans Fund on the security of local rates on and after 16th May 1964.

Loans to local authorities as defined by section 10 of the Local Authorities Loans Act 1945:

Period of loan	Per cent. per annum			
	Lower		Higher	
	A	M	A	M
Up to 5 years ... ..	5½	5¾	5¾	5¾
Over 5 but not over 10 years	5¾	5¾	6	6
Over 10 but not over 15 years	5¾	5¾	6	6
Over 15 but not over 25 years	5¾	6	6	6½
Over 25 years ... ..	6	5¾	6½	6½

The amount which an authority borrows within its annual quota will bear interest at the appropriate rate in the lower set of rates. Where authorities borrow further sums these will attract interest at the appropriate rate in the higher set of rates, unless the Public Works Loan Commissioners agree that they should be offset against the following year's quota. Different rates of interest apply according to whether the principal of a loan is repaid by way of half-yearly payments (A) or at maturity (M)

#### TRIAL OF THE PYX OF THE LONDON MINT

##### Verdict

We, whose names are hereunder written, having been sworn on the 27th day of February 1964 before the Queen's Remembrancer at Goldsmiths' Hall in the City of London, made the following assays and trials of Her Majesty's coins which, according to accounts produced by the officers of the Royal Mint in London, were coined in the said Mint from the 1st day of January 1963 to the 31st day of December 1963, both dates inclusive, in accordance with the Coinage Acts 1870 to 1946 (hereinafter called "the Acts") and were set aside and placed in the pyx of the said Mint as prescribed by regulations made under the Acts.

1. We ascertained the number of coins in each packet produced to us and that such number corresponded with the number which the officers of the Mint represented the packet to contain.

2. (a) From each of the one hundred and four packets of gold coins we took one sovereign.

(b) We weighed separately each of the said sovereigns so taken and we ascertained that it was within the variation from standard weight allowed under the Acts, and we found that such sovereigns were on the whole within such variation, being six thousandth parts of an ounce (+0.006) above standard weight.

(c) We then melted such sovereigns into an ingot and assayed such ingot comparing it with the standard trial plate of gold produced by the Board of Trade, and we found that such ingot was within the variation from standard fineness allowed under the Acts, the amount of variation from standard fineness being minus six hundred-thousandth parts (-0.00006).

(d) We weighed in bulk the residue of the coins remaining in the packets of gold coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being two hundred and fifty-four thousandth parts of an ounce (+0.254) above standard weight.

(e) We then took from such residue six sovereigns and weighed and assayed them separately, and we found that such sovereigns weighed respectively the first 123.357 grains, the second 123.250 grains, the third 123.360 grains, the fourth 123.314 grains, the fifth 123.277 grains and the sixth 123.210 grains, and that therefore the first of such sovereigns was eighty-three thousandth parts of a grain (+0.083) above, the second, twenty-four thousandth parts of a grain (-0.024) below, the third, eighty-six thousandth parts of a grain (+0.086) above, the fourth, forty thousandth parts of a grain (+0.040) above, the fifth, three thousandth parts of a grain (+0.003) above and the sixth, sixty-four thousandth parts of a grain (-0.064) below standard weight.

(f) We then assayed separately the last mentioned sovereigns and we found the millesimal fineness of such sovereigns respectively to be, the first 916.67, the second 916.61, the third 916.65, the fourth 916.59, the fifth 916.69 and the sixth 916.64 and that therefore the first of such sovereigns was one hundred-thousandth part (+0.00001) above, the second, five hundred-thousandth parts (-0.00005) below, the third, one hundred-thousandth part (-0.00001) below, the fourth, seven hundred-thousandth parts (-0.00007) below, the fifth, three hundred-thousandth parts (+0.00003) above and the sixth, one hundred thousandth part (-0.00001) below standard fineness.

3. (a) We found that the silver coins in the said pyx weighed in all not more than twelve ounces troy.

(b) We weighed in bulk such silver coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, there being no variation from standard weight.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade, and we found that they were on the whole within the variation from standard fineness allowed under the Acts, the amount of variation from standard fineness being plus nine ten-thousandth parts (+0.0009).

4. (a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation (if any) from standard weight was the amount recorded in respect thereof in the schedule hereto, and that each twelve ounces troy was therefore within the variation from standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the coins assayed were on the whole within the variation from standard composition allowed under the Acts, the amount of the only variation from standard composition being minus one fifth of one per centum (-0.2%) of nickel.

(d) We weighed in bulk the residue of the coins remaining in the packets of cupro-nickel coins and

we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being one ounce and two hundred and eighty-one thousandth parts of an ounce (+1.281) above standard weight.

Dated the 8th day of May 1964.

#### THE SCHEDULE

Five weighings of twelve ounces troy showed variations of one, nine, ten, eleven, and twenty thousandth parts of an ounce (+0.001, +0.009, +0.010, +0.011, and +0.020) respectively above standard weight; and seven such weighings showed variations of two, eight, eight, thirteen, thirteen, fifteen and eighteen thousandth parts of an ounce (-0.002, -0.008, -0.008, -0.013, -0.013, -0.015 and -0.018) respectively below standard weight.
