

Acts, being one hundred and sixty-six thousandth parts of an ounce (+0.166) above standard weight.

(e) We then took from such residue six sovereigns and weighed and assayed them separately, and we found that such sovereigns weighed respectively the first 123.257 grains, the second 123.288 grains, the third 123.293 grains, the fourth 123.278 grains, the fifth 123.198 grains and sixth 123.192 grains, and that therefore the first of such sovereigns was seventeen thousandth parts of a grain (-0.017) below, the second, fourteen thousandth parts of a grain (+0.014) above, the third, nineteen thousandth parts of a grain (+0.019) above, the fourth, four thousandth parts of a grain (+0.004) above, the fifth, seventy-six thousandth parts of a grain (-0.076) below and the sixth, eighty-two thousandth parts of a grain (-0.082) below standard weight.

(f) We then assayed separately the last-mentioned sovereigns and we found the millesimal fineness of such sovereigns respectively to be, the first 916.74, the second 916.57, the third 916.65, the fourth 916.62, the fifth 916.59 and the sixth 916.62 and that therefore the first of such sovereigns was eight hundred-thousandth parts (+0.00008) above, the second, nine hundred-thousandth parts (-0.00009) below, the third one hundred-thousandth parts (-0.00001) below, the fourth, four hundred-thousandth parts (-0.00004) below, the fifth, seven hundred-thousandth parts (-0.00007) below and the sixth, four hundred-thousandth parts (-0.00004) below standard fineness.

3. (a) We found that the silver coins in the said pyx weighed in all not more than twelve ounces troy.

(b) We weighed in bulk such silver coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, there being no variation from standard weight.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade, and we found that they were on the whole within the variation from standard fineness allowed under the Acts, the amount of variation from standard fineness being plus nine ten-thousandth parts (+0.0009).

4. (a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation (if any) from standard weight was the amount recorded in respect thereof in the Schedule hereto, and that each twelve ounces troy was therefore within the variation from standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the coins assayed were on the whole within the variation from standard composition allowed under the Acts, the amounts of variation from standard composition being minus one-tenth of one per centum (-0.1%) of copper and plus one-tenth of one per centum (+0.1%) of nickel.

(d) We weighed in bulk the residue of the coins remaining in the packets of cupro-nickel coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being three ounces and eighty-two thousandth parts of an ounce (+3.082) above standard weight.

Dated the 11th day of May 1966.

THE SCHEDULE

Two weighings of twelve ounces troy showed no variation from standard weight; seventeen such weighings showed variations of four, five, nine, ten, eleven, fifteen, seventeen, eighteen, twenty, twenty, twenty-three, twenty-seven, thirty, thirty-seven, thirty-eight and forty-eight thousandth parts of an ounce (+0.004, +0.005, +0.009, +0.010, +0.010, +0.011, +0.015, +0.017, +0.018, +0.020, +0.020, +0.023, +0.027, +0.030, +0.037, +0.038 and +0.048) respectively above standard weight; and fifteen such weighings showed variations of one, one, two, three, four, five, seven, eight, eight, twelve, thirteen, fourteen, fifteen, twenty-seven and thirty thousandth parts of an ounce (-0.001, -0.001, -0.002, -0.003, -0.004, -0.005, -0.007, -0.008, -0.008, -0.012, -0.013, -0.014, -0.015, -0.015, -0.027 and -0.030) respectively below standard weight.
