TRIAL OF THE PYX OF THE LONDON MINT

Verdict

We, whose names are hereunder written, having been sworn on the 22nd day of February 1968 before the Queen's Remembrancer at Goldsmiths' Hall in the City of London, made the following assays and trials of Her Majesty's coins which, according to accounts produced by the Officers of the Royal Mint in London, were coined in the said Mint from the 1st day of January 1967 to the 31st day of December 1967, both dates inclusive, in accordance with the Coinage Acts 1870 to 1946 (hereinafter called "the Acts") and were set aside and placed in the pyx of the said Mint as prescribed by regulations made under the Acts.

1. We ascertained the number of coins in each packet produced to us and that such number corresponded with the number which the Officers of the Mint represented the packet to contain.

2. (a) From each of the one hundred and thirty-three packets of gold coins we took one sovereign.

(b) We weighed separately each of the said sovereigns so taken and we ascertained that it was within the variation from standard weight allowed under the Acts, and we found that such sovereigns were on the whole within such variation, being fourteen thousandth parts of an ounce (+0.014) above standard weight.

(c) We then melted such sovereigns into an ingot and assayed such ingot comparing it with the standard trial plate of gold produced by the Board of Trade, and we found that such ingot was within the variation from standard fineness allowed by the Acts, the amount of variation from standard fineness being minus nine hundred-thousandth parts (-0.00009).

(d) We weighed in bulk the residuum of the coins remaining in the packets of gold coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being two hundred and ninety-one thousandth parts of an ounce (+0.291) above standard weight.

(e) We then took from such residuum six sovereigns and weighed and assayed them separately, and we found that such sovereigns weighed respectively the first 123.258 grains, the second 123.292 grains, the third 123.316 grains, the fourth 123.324 grains, the fifth 123.389 grains and the sixth 123.251 grains, and that therefore the first of such sovereigns was sixteen thousandth parts of a grain (-0.016) below, the second, eighteen thousandth parts of a grain (+0.018) above, the third, forty-two thousandth parts of a grain (+0.042) above, the fourth, fifty thousandth parts of a grain (+0.050) above, the fifth, one hundred and

TREASURY

Treasury Chambers, London S.W.1

The Lords Commissioners of Her Majesty's Treasury hereby give notice that they have made an Order under section 2 (3) of the Purchase Tax Act 1963, viz.:

The Purchase Tax (No. 1) Order 1968.

This Order reduces from 30,000 to 20,000 British thermal units per hour the qualifying limit for the exemption from purchase tax of certain gas-fired water boilers and electrical appliances for domestic central heating systems.

The Order comes into operation on 13th May 1968, and has been published as Statutory Instruments 1968 No. 709.

fifteen thousandth parts of a grain (+0.115) above and the sixth, twenty-three thousandth parts of a grain (-0.023) below standard weight.

(f) We then assayed separately the last mentioned sovereigns and we found the millesimal fineness of such sovereigns respectively to be, the first 916.81, the second 916.63, the third 916.83, the fourth 916.44, the fifth 916.46 and the sixth 916.66 and that therefore the first of such sovereigns was fifteen hundred-thousandth parts (+0.00015) above, the second, three hundred-thousandth parts (-0.00003) below, the third, seventeen hundred-thousandth parts (+0.00017) above, the fourth, twenty-two hundred-thousandth parts (-0.00022) below, and the fifth, twenty hundred-thousandth parts (-0.00020) below standard fineness and that the sixth showed no variation from standard fineness.

3. (a) We found that the silver coins in the said pyx weighed in all not more than twelve ounces troy.

(b) We weighed in bulk such silver coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being two thousandth parts of an ounce (+0.002) above standard weight.

(c) We then assayed such silver coins comparing them with the silver trial plate produced by the Board of Trade, and we found that they were on the whole within the variation from standard fineness allowed under the Acts, the amount of variation from standard fineness being minus seventeen hundred-thousandth parts (-0.00017).

4. (a) We found that the cupro-nickel coins in the said pyx weighed in all more than twelve ounces troy and we took one or more coins from each packet of cupro-nickel coins.

(b) We weighed each twelve ounces troy (at standard weight) of cupro-nickel coins so taken out and ascertained that the amount of its variation from standard weight was the amount recorded in respect thereof in the schedule hereto, and that each twelve ounces troy was therefore within the variation from standard weight allowed under the Acts.

(c) We then assayed separately cupro-nickel coins weighing in all twelve ounces troy (at standard weight) comparing them with the copper trial plate and the nickel trial plate produced by the Board of Trade, and we found that the coins assayed were on the whole within the variation from standard composition allowed under the Acts, the amounts of variation from standard composition being minus one tenth of one per centum (-0.1%) of copper and minus one fifth of one per centum (-0.2%) of nickel.

(d) We weighed in bulk the residue of the coins remaining in the packets of cupro-nickel coins and we ascertained that they were on the whole within the variation from standard weight allowed under the Acts, being two hundred and twenty-five thousandth parts of an ounce (-0.225) below standard weight.

Dated the 10th day of May 1968.

THE SCHEDULE

Five weighings of twelve ounces troy showed variations of five, six, seven, ten and seventeen thousandth parts of an ounce (+0.005, +0.006, +0.007, +0.010 and +0.017) respectively above standard weight; and five such weighings showed variations of one, nine, twenty-three, thirty-six and fifty thousandth parts of an ounce (-0.001, -0.009, -0.023, -0.036 and -0.050) respectively below standard weight.
