

The London Gazette.

Numb. 447

Published by Authority.

From Thursday, February 24. to Monday February 28. 1669.

Pendennis, Feb. 21.

THis last week went hence several vessels-homewards bound, most of them from France, and one from Virginia belonging to New-England bound for London laden with Tobacco. On Friday last arrived a vessel of this Port from Mayseill's. Here are now in Port several vessels from Weymouth and Southampton bound for Newfoundland, one Ketch for Jamaica, and several other ships for France.

Lyme, Feb. 23. Yesterday put in here by contrary winds the *Providence* of Topham from the Canaries, having been long at sea, and suffered much by ill weather, and must have ran much hazard had she not been providentially supplied by a French Merchant ship accidentally met with far out at sea.

Naples, Feb. 4. Don Pedro d' Arragon our Viceroy, has sent several dispatches into Spain to give the Queen Regent an account of the Conclave, of the several factions, and the little probability there is of coming suddenly to an Election.

He continues apprehensive lest the Turks may have an inclination to make some attempts upon this Kingdom, and has therefore renewed his Orders to all the Horse and Foot within the Kingdom to be in readiness to take the field at the Spring, and to march according as they shall be commanded.

The Banditti give frequent allarums to the Countrey, and commit several violencies; whereupon several Companies have been ordered to march against them and to clear the Countrey of them.

Don Paul de Leon, Governour of the Fort of Raye being lately dead, the Viceroy has conferred that vacant Charge for the present, upon Antonio del Duogo a Horse Officer, till farther Order shall be sent from the Queen Regent for the disposal thereof.

Tangier, Feb. 9. The Emperour of Morocco has Ordered all the English which were secured and stopped at Salley, since the Cessation of armes made with him to be set at Liberty and sent hither. He has had lately great success against two of his Nephews, who had raised up the people into a Rebellion, and had put themselves into the head of a great Army, which is defeated, and the Country now more than before settled under this Obedience. So that he will in little time be able to give security to His Excellency the Lord Howard, and his said designs to give him Audience at Salley. His Excellency is as yet diverting himself at Seville, but intends in few days to return again to this place.

Genova, Feb. 12. Yesterday and this day put in here several small Herring ships in 42 days from Cadix, having met with extraordinary ill weather by the way, in which they were separated in the Gulf of Lyons from several others which were in their company intended for Legora. Eight ships, Dutch, French, and Genueise intend to put to sea with the first fair weather, designed for the coasts of Spain. The *Falcon* and *Speedwel* are hourly expected here from Legora.

The Prince of Doria has been dangerously ill of the Small pox but is again upon recovery.

From Milan we are told, that there is not yet any cer-

tain time prefixed for the arrival of the Duke d' Ossuna, who is to succeed in that Government, for whose reception order is already taken; his Entry will be made with much more Magnificence than any of his predecessors; his Coaches and Liveries extraordinary rich; it is believed his arrival may be in little time, he expecting only such weather as may encourage him to put to sea upon the Gallies which attend him at Barcellona. An Extraordinary Courier from Spain intending for Rome, passed lately by Genova, where he left order for the payment of 8000 Pistols in Gold to the Duke d' Ossuna upon his demand.

From Turin they write that the young Prince had lately some little fits of a Feavor, and that on the 28th past happened a sudden fire upon the Rhosne Bridge at Geneva, which in few hours consumed the whole Bridge and above an hundred persons which were suddenly enclosed and perished in the Flames & the loss is said to amount to more than a Million; above 500 persons are since employ'd in the cleansing of the River, out of which they have taken up many bodies of people half burnt.

Venice, Feb. 15. Letters from Sirsa advise us, that our Captain General Morosini was there arrived from Zant, and that the Provost General Bernardi was gone for Zant, where he intends to enter upon and take possession of his Charge: the Captain General is preparing for his return home, expecting the arrival of second Letters of permission from the Senate, the first having had the fortune to be lost by the way.

Cavalier Molino continues still at Canea, from whence by Letters of the first of January he informs us of the great civilities he daily receives from the Bissa of that place upon all occasions; telling us that the Visier has disbanded a considerable part of his forces, and that what ever reports have been thrown abroad to the contrary, he continues in the esteem of the Grand Signior, and intends in little time to attend him at the Port, whither he has been invited with all the Compliments and kind expressions which could be imagined from so great a Minister, who repoles extraordinary confidence both in his Counsel and Valour, and for that reason desires to have him always near his person.

Cavalier Molino presses the sending away the Prefens designed for the Ottoman Port, the expectation whereof occasions his stay at Canea, especially those designed for the Visier.

The Senate proceeds in the Retrenchment of all superfluous expences, and intend to reform Three Generals as Charges unnecessary at the present, viz. That of the Three Islands, that of the Debarcations; and that of the Gallions.

In Ischia are lately arrived four of our ships, having on board them a considerable number of soldiers and other people which came from Candia upon its surrender, with whom are also there arrived the 2d Captain of the Gallions, and General Spaur, which news is the more pleasing and acceptable to us, because of our fears and apprehensions for that General upon some reports of the great hazards he ran in the late violent Temp st.

The last week arrived here a ship with 54 Pioneers, the poor remainder of 2300 which were sent to serve in Candia during that Siege, and of those many lame and crippled. They have since received all the arrears of their pay and a considerable reward for their service.

The

The Prince and Landgrave of *Hassia* is gone from hence to *Rome*, his Princes and Son have taken their way towards *Germany*.

On Saturday last the Dutches of *Cori* was brought to bed of a Daughter, in presence of Eight persons and a publick Notary, whom her Husband the Marquis de *Saintinelli* ordered to be present as witnesses of the truth of the birth.

The great Feast which was to have been in *St Marks* place on Thursday last was by reason of the ill weather deferred till the Sunday following, on which day the Bulls are to be hunted in the Court of the Dukes Palace, and afterwards an entertainment to be given to the Ladies and persons of the greatest quality.

Katisbonne, Feb. 18. The diversions of the Carneval have put a stop to all affairs of graver concernment, The 16th instant the Emperours High Commissioner entertained all the rest of the Plenipotentiaries and Deputies from the Electors and Princes of the Empire with an extraordinary Feast and Banquet; the *Brandenbourg* Ministers only absenting themselves upon some contention of precedence which is not yet stated between them and the said Prince and Bishop of *Aichstadt*.

The business of the publick security of the Empire is in the same posture as formerly; the Directors of the College are labouring at a Project to satisfy all interests, and answer all objections arising upon that subject; the greatest obstacles of this affair has been the private quarrels and animosities amongst several Princes, which is believed may in little time admit of reconciliation; those between the Electors of *Saxony*, *Palatine*, *Mens* and *Triers* being already compoised, and those between other Princes in a fair way to be speedily determined.

Monsieur de *Graville* the French Minister has been received and Treated with much respect and civility at the Court of *Bavaria*, and is by this departed thence for *Newbourg*, intending to return by *Wurtzburg*, and to have some conference with the Elector of *Munich*.

Hambourg, Feb. 28. As yet the Commissioners for the compoising of the differences between the Crown of *Denmark* and the Duke of *Holstein Ploen* have not made any considerable advances in that affair, the Duke having no inclination to part with what he conceives to be his right, as to the succession of *Oldenbourg*, though very considerable overtures have been made to him in lieu of his pretensions.

Letters of the 5th instant from *Stockholme* tell us, that the extremity of the cold which has frozen up for above two Months, all the entrys into the Countrey, has hindered Marshal *Wrangel* from his intended return to that place.

The Senators of the Crown were expected at *Stockholm* the 15th instant to consult about the present concerns of the State.

Letters of the 7th instant from *Warsaw* tell us, that five of the preparatory provincial Diets are broken up with dissatisfaction upon the point of the Kings Marriage, which some persons labour to perswade the people to be dangerous and prejudicial to *Poland*, and the prelude to great and expensive wars. The Dietine of Great *Poland* is also broken, where the contentions amongst the Nobility, were so very great, that frequent Duels passed amongst them, and they were twice obliged to shut up the Church where the Convention was held, to avoid greater and more general disturbances. The Bishop of *Cracovia* endeavouring, but in vain to exhort them to a more quiet temper.

The King being informed of the departure of his Royal Spouse with the Empress Dowager, and a Train of near Ten thousand persons from *Vienna*, having first given out fresh Commissions for new Assemblies to be held in the Provinces and Palatinates, whole Diets were by the disunion of the Nobility broken up, left *Warsaw* the 7th instant in the afternoon, and with a great Train of the principal Lords and Officers of the Crown, set for-

wards for *Czenstokow*, having sent before him the Bishop of *Plosko*, to receive the Queen upon the frontiers, and to compliment her in his Majesties name.

From *Leipssa* they write, that the pretended Prince *Cigala* has been removed with a Passport from the Prince Elector of *Saxony*, from thence to *Nuremberg*.

From *Kosloff* they write, that the Post of *Pomerania* was robbed on his way thither, and wounded, and left for dead by two persons who having committed the fact, and thinking themselves secured from discovery by the death of the Post, came with much confidence into *Kosloff*, but the wounded person recovering his senses, and brought into the Town, discoverd the Villains, who were presently apprehended, and may be in little time proceeded against according to justice.

Paris, Mart. 1. His Majesty continues his Resolution of marching this Spring into *Flanders*, but not with that number of foot guards as was at first designed, intending only 50000 continuance in those parts.

Here is lately arrived a Courier from Cardinal de Retz, who is intrusted with the management of the French concerns in the Conclave, with Letters to his Majesty, giving him an account of all his affairs there, but as yet no prospect can be taken of the Election. The faction of the *Chigi* appears to have most prevalency, and Cardinal d'Elci the person they seem most inclined to promote to this high Dignity, but is believed also, the other faction may be powerful enough to exclude him.

The Arch-Bishop of *Thoulose*, formerly Bishop of *Beziers*, his most Christian Majesties Ambassadour to the Court of *Spain*, has been desired by the Queen Regent not to take his way by *Saragosa* the place where *Don Juan* keeps his Residence, whereupon he has altered his intended course taking the way of *Valence*.

The Marquis de *Chatillon*, his Majesties Lieutenant in *Roussillon* has ordered the Governor of *Ville Franchoise* in the County of *Cansians*, to be sent Prisoner to *Perpignan*, for delivering up 15 Bandits which he had Prisoners in his Castle, to a greater number of those Robbers who surprised him in the night, and by threats obliged him to set at liberty their Companions.

The people of *Cansians* in *Roussillon* having disorderly got together and killed 14 persons, who where there over-severely leavying the Taxes layd upon them, His Majesty has ordered the Count de *Chamilli* his Lieutenant General to march thither with 4000. men to reduce them to obedience, and to search out and punish the principal offenders of that disorder.

Deal, Feb. 26. Two days since arrived in the Downs a Fleet of about Eighty sail of Merchants Ships from several parts, and since about Forty sail more, whereof Twelve from the *Streights*.

Advertisements.

THE Officers of the Receipt of the Exchequer having paid the 1429th Order Registered on the Act for Eleven months Tax, shall proceed to the payment of the subsequent Orders to that number as the Money shall be brought in.

UPON a General account of all the Burials in the University and Town of Cambridge from the Twenty ninth of September 1669. until the Fourteenth of February 1670. Signed by Doctor Fletewood the Pro-Vicechancellor, and Mr. Williams the Mayor; it appears that the number of all the burials during that time amounts to One hundred and eighty, whereof of the Small pox Sixty five, of which last number onely Fourteen died out of the Colleges.
