MINISTRY OF DEFENCE

NAVY DEPARTMENT

CENTRAL CHANCERY OF THE ORDERS  
 OF KNIGHTHOOD

St. James's Palace, London S.W.1.  
 14th November 1972.

The QUEEN has been graciously pleased to approve the award of the British Empire Medal for Gallantry (Military Division) to the undermentioned:

Leading Marine Engineering Mechanic Peter William HODGE, P/108243.

On 23rd January 1972 H.M.S. *Naiad* was on passage from Portland to Bermuda. At 0530 the coupling on the starboard shaft between the turbine and the gearbox burst. The turbine oversped, ran its bearings and shed blades through the condenser. As a result feedwater and lubricating oil were heavily contaminated with sea water. Shortly afterwards both boilers primed followed by the boiler room turbo alternator which could not be tripped on transfer of load to a diesel generator, overspeeding and also running bearings and shedding blades.

Hodge was on watch in the boiler room throughout these events. He rapidly appreciated that the turbo alternator had failed to trip and had accelerated out of control. Without hesitation and with no regard for his own safety he ran towards the alternator, which was now in a very dangerous state, and closed the adjacent master valve, thus bringing the alternator under control.

Hodge's actions which were made entirely on his own initiative were instrumental in preventing severe damage and loss of life within the boiler room. He displayed great courage and coolness in a highly dangerous situation.
