STATE SCHEME PREMIUMS—MARKET LEVEL INDICATORS

The new state pension scheme which started in April 1978, allows contracted-out occupational pension schemes in certain circumstances, to transfer the responsibility or part of the responsibility, for their members' guaranteed minimum pension rights to the state scheme by the payment of premiums.

The premiums concerned are limited revaluation premiums, accrued rights premiums and pensioners' rights premiums. Their amounts are, in part, related to stock market levels at the time they become due and DHSS each month notifies the average market level indicator to be used in their calculation under the State Scheme

Premiums (Actuarial Tables) Regulations 1978 (S.I., 1978, No. 134).

For April 1980 the average market level indicator for accrued rights premiums and limited revaluation premiums is 60. Theh corresponding average market level indicator for pensioners' rights premiums is 67.

The average market level indicator for ARPs and LRPS shows a decrease of 3 since the previous month. The average market level indicator used for PRPs shows an increase of 1 (one) since the previous month. (4 S.I.)
