FOOTNOTES

1. This band is allocated to stations in the amateur service on a secondary basis on condition that they shall not cause interference to other services.
2. This band is shared with other services.
3. This band is available to amateurs until further notice provided that use by the Licensee of any frequency in the band shall cease immediately on the demand of a Government official.
4. The type of transmission known as Radio Teleprinter (RTTY) may not be used in this band.
5. Use by the Licensee of any frequency in this band shall be only with the prior written consent of the Secretary of State.
6. This band is not available for use within the area bounded by 53°NO2E, 55°NO2E, 53°NO3W and 55°NO3W.
7. In this band the power must not exceed 10 dBW erp (effective radiated power).
8. Use by the Licensee of any frequency in this band shall only be with written consent of the Secretary of State and such consent shall indicate the power which may be used, taking into consideration the characteristics of the Licensee's station.
9. Slow Scan Television may be used in this band.
10. High Definition Television (A3F, C3F, F3F, G3F) may be used in this band.
11. Facsimile Transmission (A3C, F3C, G3C) may be used in this band, with a bandwidth not greater than 6 kHz.
12. The amateur-satellite service also has an allocation in this band.
13. This band is allocated to stations in the amateur-satellite service on a secondary basis, on condition that they shall not cause interference to other services.
14. The amateur-satellite service may operate in this band in accordance with International Radio Regulation 2741, viz:
Space stations in the amateur-satellite service operating in bands shared with other services shall be fitted with appropriate devices for controlling emissions in the event that harmful interference is reported in accordance with the procedure laid down in Article 22 of the Radio Regulations. (Administrations authorising such space stations shall inform the IFRB and shall ensure that sufficient earth command stations are established before launch to guarantee that any harmful interference which might be reported can be terminated by the authorising administration (see RR 2612).)
15. The use of the amateur-satellite service in the following bands shall be limited to the direction stated below:
1260—1270 MHz Earth to Space
5650—5670 MHz Earth to Space
5830—5850 MHz Space to Earth
16. The bands allocated to the amateur service at 3·5, 7·0, 10·1, 14·0, 21·0, and 144 MHz may, in the event of natural disasters, be used by non-amateur stations to meet the needs of international emergency communications in the disaster area in accordance with regulations of the Radio Regulatory Department.
17. Since high intensities of RF radiation may be harmful, the following safety precaution must be taken: in locations to which people have access, the power density on transmit must not exceed the limits recommended by the competent authorities. Currently this limit is 10 mW/cm².
18. Data transmission may be used within the frequency bands 144 MHz and above provided (a) the Station callsign is announced in morse or telephony at least once every 15 minutes and (b) emission is contained within the bandwidth normally used for telephony.
A. DC input power is the total direct current power input to (i) the anode circuit of the valve(s) or (ii) any other device energising the antenna.
B. An alternative for R3E and J3E single sideband types of emission, the power shall be determined by the peak envelope power (PEP) under linear operation.
C. Double Side Band suppressed carrier emissions are permitted within the terms of this licence.
D. The symbols used to designate the classes of emission have the meaning assigned to them in the Telecommunication Convention. They are:

Amplitude Modulation

- A1A Telegraphy by on-off keying without the use of a modulating audio frequency.
- A1B Automatic telegraphy by on-off keying, without the use of a modulating audio frequency.
- A2A Telegraphy by on-off keying of an amplitude-modulating audio frequency or frequencies, or by on-off keying of the modulated emission.
- A2B Automatic telegraphy by on-off keying of an amplitude-modulating audio frequency or frequencies, or by on-off keying of the modulated emission.
- A3E Telephony, double sideband.
- A3C Facsimile Transmission.
- H3E Telephony using single sideband full carrier, amplitude modulation.
- R3E Telephony, single sideband, reduced carrier.
- J3E Telephony, single sideband, suppressed carrier.
- A3F/C3F Slow scan television and high definition television.

Frequency Modulation

- F1A Telegraphy by frequency shift keying without the use of a modulating audio frequency: one of two frequencies being emitted at any instant.
- F1B Automatic telegraphy by frequency shift keying without the use of a modulating audio frequency.
- F2A Telegraphy by on-off keying of a frequency modulating audio frequency or frequencies, or by on-off keying of a frequency modulated emission.
- F2B Automatic telegraphy by on-off keying of a frequency modulating audio frequency or frequencies, or by on-off keying of a frequency modulated emission.

- (i) first symbol—type of modulation of the main carrier.
- (ii) second symbol—nature of Signal(s) modulating the main carrier.
- (iii) third symbol—type of information to be transmitted.

INTERPRETATION

- (i) *Carrier Power of a Radio Transmission.* The average power supplied to the antenna from a transmitter during one radio frequency cycle under conditions of no modulation. This interpretation does not apply to pulse modulated emissions.
- (ii) *Peak Envelope Power of a Radio Transmitter.* The average power supplied to the antenna by a transmitter during one radio frequency cycle at the highest crest of the modulation envelope, taken under conditions of normal operation.
- (iii) *Effective Radiated Power (e. r. p.)* (in a given direction): The product of the power supplied to the antenna and its gain relative to a half-wave dipole in a given direction.

The Social Security Advisory Committee give notice that they have been asked by the Secretary of State for Social Services under section 10 of the Social Security Act 1980 to consider and report on regulations entitled *The Child Benefit (General) Amendment Regulations 1982*.

A short explanatory note provided by the Department of Health and Social Security on these regulations is appended to this notice. The Committee will take into account any comments or objections made by or on behalf of people or organisations who would be affected by the regulations received by them not later than 5th May 1982. J. F. Rutherford, Assistant Secretary

EXPLANATORY NOTE

These Regulations amend the Child Benefit (General) Regulations 1976 which are the "principal regulations". As they now stand, regulation 7 of the principal regulations provides for the continuation of child benefit in respect of a school leaver to a specified terminal date after leaving school. The dates are:

- the first Monday in January;
- the first Monday following Easter Monday; and
- the first Monday in September.

Regulation 2 provides that child benefit is not to be payable during the specified period for any week in which the school leaver is engaged in full-time gainful employment. Where the question arises, it will be for the independent statutory authorities to decide whether employment is "full-time" and "gainful".

Regulation 3 concerns school leavers who receive financial support by way of payments under the Employment

and Training Act 1973—e.g., those on the Youth Opportunities Programme. As Regulation 7B of the principal regulations now stands the general exclusion from child benefit of young persons receiving this type of financial support does not apply to any period prior to the specified terminal date. Regulation 3 will ensure that henceforth child benefit is not payable for any week when a young person is on a Youth Opportunities Programme course or other relevant sponsored training.

Regulation 4 concerns young persons receiving education by virtue of their employment. At present in regulation 8 of the principal regulations, entitlement to child benefit is not excluded for these persons if either the education lasts for a continuous period of at least 6 months and there is no financial support from the employment, or the first terminal date after leaving school has not yet been reached. Regulation 4 will ensure that entitlement is not excluded in the former case only—i.e. if there is continuous education and no financial support.
