WATER RESOURCES ACT

NATIONAL RIVERS AUTHORITY—NORTH WEST REGION

Notice of an application to vary licences to abstract water

Notice is hereby given that an application is being made to National Rivers Authority, North West Region, by North West Water Ltd., Dawson House, Great Sankey, Warrington, Cheshire WA5 3LW, to vary the licences which authorise abstraction from the following sources of supply: Stocks Reservoir, Barnacre Reservoirs, Chipping Springs, River Wyre at Garstang and boreholes in the Broughton and Garstang areas of the Fylde.

These sources are operated as part of the Lancashire Conjunctive Use Scheme.

The existing licences incorporate conditions which limit the quantities of water which may be abstracted from groups of sources. The abstractions safeguard other groundwater users and mitigate the effects of borehole abstractions on river flows by a requirement to augment the rivers under certain low flow conditions. The purpose of the variations is:

- to regroup the licences in accordance with their operational groups.
- to remove conditions which limit the conjunctive quantities abstracted from various combinations of groups.
- to remove conditions which limit the total quantities which are authorised to be abstracted from boreholes over a rolling three year period.

There will be no increase in the maximum authorised abstraction from the groups.

The daily total of water authorised to be abstracted from all boreholes will remain unchanged. The proposed annual total licenced from all boreholes of 27,774 megalitres is less than the existing total of 29,103 megalitres, which however includes groundwater abstracted by ICI Ltd. Following the variation the ICI abstraction of up to 5,455 megalitres per year will continue separately.

The clauses to protect river flows will remain, with the exception of the deletion of the following clauses:

- (1) A level condition in observation borehole T68 at NGR SD 541 335, which is no longer relevant.
- (2) A level condition in observation boreholes 104, at NGR SD 505 403, and 135, at NGR SD 488 429.

Base flow in the rivers Brock and Wyre will be maintained by augmentation irrespective of water levels in these drift boreholes.

Augmentation of the River Brock will not be required in respect of abstraction from boreholes K1 and K2 at NGR SD 501 401.

Abstraction at the Broughton sites will become subject to a level condition in observation borehole T74 at NGR SD 487 320.

A copy of the application, which gives full details of the proposed variations, with maps and plans submitted with it may be inspected, free of charge, at Franklaw WTP, Catterall Lane, Catterall, Garstang, Preston PR3 0PJ, between the hours of 8.30 a.m. to 4.30 p.m. Monday to Friday during the period 11th June to 9th July 1990.

Any person who wishes to make representations about the application should do so in writing to National Rivers Authority, Control and Regulation Section, Richard Fairclough House, Knutsford Road, P.O. Box 12, Warrington WA4 1HG, before the end of the said period.

J. M. Tyson, on behalf of North West Water Ltd. (725)
