## WATER ACTS

### NATIONAL RIVERS AUTHORITY—ANGLIAN REGION

#### WATER ACT 1989, PART III

##### *Notice of Application for Consent in Pursuance of Schedule 12*

Notice is hereby given, in accordance with Schedule 12 of the Water Act 1989, that an application has been made to The National Rivers Authority, Anglian Region, by Mr. W. T. Brand for consent to discharge 45,500 cubic metres per day of trade effluent derived from trout farming to the River Welland at National Grid Ref. SP 8879 9467 within the Corby District Council area from a proposed fish farm at Gretton Mill, Gretton, Corby, Northamptonshire. This water will have previously been abstracted from the River Welland.

Any person who wishes to make representations about the application should do so in writing to the Regional Manager (Environment and Fisheries), National Rivers Authority, Anglian Region, Kingfisher House, Goldhay Way, Orton Goldhay, Peterborough PE2 0ZR, not later than 29th November 1990, quoting ref. No. PR/N/N/F/3779.

A copy of the application may be inspected free of charge at the offices of The National Rivers Authority, Anglian Region, Northern Area, Clover Hill, Park View, Kettering, Northants.

*J. A. Tellow*, Regional Manager (Environment and Fisheries)  
on behalf of National Rivers Authority, Anglian Region.

14th September 1990.

### NATIONAL RIVERS AUTHORITY—SOUTH WEST REGION

#### WATER ACT 1989

##### *Notice of Applications for Consent Under Schedule 12*

Notice is hereby given, pursuant to Schedule 12 of the Water Act 1989 that the following applications have been made to the National Rivers Authority South West Region:

Application reference 050/29D/13 by Meldon Quarry Ltd. to discharge (1) a maximum of 18,000 cubic metres per day of surface water at NGR SX 565 929, (2) a maximum of 22,500 cubic metres per day of surface water at NGR SX 567 931, (3) a maximum of 17,250 cubic metres per day of surface water at NGR SX 567 923 to the West Okement (a tributary of the River Torridge) from the Meldon Quarry complex at Okehampton. The NRA will technically appraise the application with a view to controlling the metallic content and acidity of all three discharges.

Application reference 046/06A/13 by Torbay Borough Council to discharge a maximum of 3,060 cubic metres per hour of surface water to an unnamed tributary of the Aller Brook in the Teign catchment at NGR SX 8952 6634, and a maximum of 6,480 cubic metres per hour of surface water to the same watercourse at NGR SX 8915 6624 from a development on land adjacent to Newton Road, Edginswell, Torbay.

Application reference 045/05A/67 by the RSPCA to discharge a maximum of 5,768 cubic metres per day of treated domestic and trade sewage effluent and surface water to a tributary to Alphin Brook in the Exe catchment at NGR SX 8911 9143 from the RSPCA Kennels, Little Valley, Black Hat Lane, Pocombe Bridge, Exeter.

Application reference 045/02B/13 by Coastal Counties Housing Association to discharge a maximum of 129.48 cubic metres per day of surface water to an unnamed tributary to the River Axe in the Axe catchment at NGR SY 2762 9490 from a proposed development at Doatshayne Lane, Musbury, Devon.

Copies of these applications may be inspected free of charge at all reasonable hours at the Authority Offices at Manley House, Kestrel Way, Sowton Industrial Estate, Exeter.

Any person who wishes to make representations about these applications should do so in writing to The Environmental Protection Manager, National Rivers Authority South West Region, Manley House, Kestrel Way, Sowton, Exeter EX2 7LQ, quoting the relevant reference not later than 29th November 1990.

## THAMES WATER UTILITIES LIMITED

### WATER BYELAWS

#### WATER ACT 1945, SECTION 19(4)

#### WATER ACT 1989, SCHEDULE 26 PARAGRAPH 19(1)

Thames Water Utilities hereby give notice that an application has been made to the Secretary of State for the Environment for his consent to the relaxation, by the Utility, of byelaws 3, 74(a) and 82 of the byelaws made by the former Thames Water Authority on 3rd April 1987. The byelaws were confirmed by the Secretary of State on 24th October 1988 and came into operation on 1st January 1989.

The purpose of the relaxation is to enable flushing valves to be installed and used to serve watercloset pans and urinals in two proposed buildings at sites known as DS1 and DS2 forming part of the London Docklands Development at Canary Wharf, London.

Thames Water Utilities Limited believe that the requirements of byelaws 3, 74(a) and 82 are unreasonable in this case in that they prevent the installation and use of flushing valves for a trial period.

The purposes of the trials are to show that the flushing valves are likely to prove more economical in water use than the devices specified in the byelaws and that the valves will make more space available for use within the buildings for other purposes. Objections to the proposed relaxations should be made in writing to the Department of the Environment, Room A4.37, Romney House, 43 Marsham Street, London to arrive not later than one month from the date of this publication.

*D. Badcock*, Secretary

Nugent House, Vastern Road,  
Reading RG1 8DH.

## THAMES WATER UTILITIES LIMITED

### WATER ACT 1989

#### *Notice of Making of a Drought Order*

##### *The Thames Water Utilities Limited (Drought) (No. 3) Order 1990*

Notice is hereby given that on 15th October 1990, the Secretary of State for the Environment made an Order under section 131 of the Water Act 1989.

2. This Order which is in addition to, and not in substitution for, the Thames Water Utilities Limited (Drought) (No. 2) Order 1990, enables Thames Water Utilities Limited ("the Company") to alleviate the threatened deficiency of water and to continue to supply sufficient water for essential purposes by abstracting water from the boreholes upon the conditions listed in paragraph 4 below and to amend the Company's existing abstraction licence as detailed in paragraph 5 below.

3. The aforementioned abstractions and amendment of the Company's existing abstraction licence will come into effect on 16th October 1990, and continue for so long as the Company thinks necessary but not exceeding 6 months for the said 16th October 1990.

4. Water is to be abstracted from the boreholes at the following locations and subject to the following limitations:

- One Borehole at Kemble in Gloucestershire National Grid reference ST 9847 9764 subject to a maximum abstraction of 4 megalitres per day and the Company may, for the purpose of installing a temporary water treatment plant at this borehole and connecting this borehole to the Company's water distribution network, enter upon occupy and use the lands shown hatched red on the map deposited at the offices of the Secretary of State for the Environment, provided that the Company shall give not less than twenty four hours notice to every owner, lessee and occupier of those lands of their intended entry on the land.
- One Borehole at Avebury in Wiltshire National Grid Reference SU 0890 7008—subject to a maximum abstraction of 3 megalitres per day.
- Five Boreholes at Ogbourne in Wiltshire, National Grid References (i) SU 1999 7560 (ii) SU 2013 7536 (iii) SU 2016 7517 (iv) SU 1968 7561 (v) SU 1934 7550—subject to total maximum abstraction of 4 megalitres per day from the above 5 boreholes.
- One Borehole at Maddie Farm in Berkshire National Grid Reference SU 3049 8174, one Borehole at Upper Lambourne in Berkshire, National Grid Reference SU 3171 8051—subject to a total maximum abstraction of 2 megalitres per day from the above 2 boreholes.
