The Lords Commissioners of Her Majesty's Treasury read section 3(2) of the National Loans Act 1968 (1968 C.13 as amended) whereby any sums borrowed from the Public Works Loan Commissioners shall bear interest at such rates as the Treasury may determine from time to time in accordance with section 5 of the said Act.

- (ii) Different rates of interest shall be charged on such fixed rate loans according to whether the principal of a loan is repaid by instalments or at maturity and, if repaid by instalments, whether by equal instalments of the principal with interest paid on the decreasing balance of the principal (E.I.P.), or by instalments of equal repayments of the principal and interest paid thereon (E.R.);
- (iii) The rates of such interest shall be:

This Order may be cited as the Cumbria County Council (Marble Quarry and Hale Fell) Limestone Pavement Order 1991.

SCHEDULE

The area includes most of Marble Quarry, Hale Fell and Beetham Park lying between the hamlets of Slackhead and Hale. The west side is bounded by Slackhead Lane and part of the southern boundary by a minor road running from Hale and the A6 trunk road. The wooded limestone hill of Hale Fell is prominent from the A6 trunk road to the east and together the areas form an integral part of the landscape of the AONB. Lying within the woodland are extensive areas of both wooded and open pavement, mostly on the gently sloping south-west side of the hill. On the north east side are a series of terraces and scars. The pavement dominates the landscape wherever it occurs with its striking beauty, spectacular formations of clints, grikes and runnels and contrasting colours and textures. The area is crossed by a number of public footpaths including the Limestone Link path and the Beetham Trial. Parts of the area have been leased to the Forestry Commission and planted extensively with conifers. On remaining open areas the floristic interest of the area is high, nationally rare and uncommon species occurring. Many of the wooded pavements are dominated by yew. Geologically the pavement represents a very good example of well dissected inclined pavement and solution features—the beds are massive and frequently well veined. Some unusual 'humped' pavement also occurs. The total area covered by the Order is 66.9 ha.

This Order may be cited as the Cumbria County Council (Major Woods) Limestone Pavement Order 1991.

SCHEDULE

Major Woods is an impressive, low lying area of ancient semi natural woodland lying close to the hamlet of Slackhead between Slackhead Lane and Leighton Beck Road. Forming an integral part of the landscape of the AONB, the woods slope gently to the south-west and have an unusual irregular shaped edge with isolated copses and finger like projections extending into adjoining meadowland. The occurrence of the largely intact limestone pavement coincides almost exactly with the extent of the woodland. The extent and frequency of pavements and scars is associated with an exceptionally rich and varied flora including nationally rare or uncommon ground flora. Geologically the pavement contains well dissected clints, generally without complex networks of runnels. In parts of the wood an impressive pattern of finger like runnels on long and thin clints at a diagonal angle to the dip of the slope is a unusual feature. There are no public footpaths in the area. The total area covered by the Order is 35.2 ha.

This Order may be cited as the Cumbria County Council (Underlaid Wood) Limestone Pavement Order 1991.

SCHEDULE

The pavement is situated in the Arnsdale/Silverdale AONB about 3 km south west of Milnthorpe and 2½ km east of Arnsdale, between the villages of Beetham of Storth. It includes Underlaid Wood, Beetham Fell and Whinscar and a number of small neighbouring and on contiguous parcels of woodland, grazing land.

The main block is bounded on the north by Cockshot Lane and on the south by Dolly Wood Lane. Underlaid Wood/Beetham Fell/Whinscar forms and extensive prominent wooded hill forming a dominant skyline feature. Although ancient in origin much of the woodland is now commercially planted but with fragments of ancient woodland still remaining. Substantial outcrops of limestone pavement, both open and wooded, lie within the woodland. Some of the open pavements are amongst the most impressive in the Arnsdale/Silverdale AONB and dominate the landscape where they occur. Some of the wooded pavements of note include an impressive block of inclined pavement in Tarn Close Wood and a long limestone scar in Longthroughs Wood. The area includes the "Fairy Steps" where a narrow passage has been formed through the limestone scar. Floristically Underlaid Wood ranks amongst the very best in the AONB; three nationally rare species occurring as well as a large number of uncommon species. The extensive outcrops of limestone pavement in the area display an exceptional variety of very high quality features. A good network of well used public

footpaths including the "Limestone Link" traverse the area and "Fairy Steps" is particularly well known for its rock features and extensive views of Arnsdale and the Kent Estuary. The total area covered by the Order is 176 hectares.

SCHEDULE

Haverbrack Bank is a prominent south-west facing wooded hill overlooking the Kent Estuary immediately to the east of the hamlet of Sandside and bounded on the south by Cockshot Lane. The area is of landscape, floristic, geological and physiographic interest by reason of the attractive mosaic of wooded and open pavements, scars and grassy glades, hidden amongst semi-natural and planted woodland. The pavement often dominates the landscape with its striking beauty while the vegetation on the pavement consists of a number of nationally rare or uncommon species, many of which are typically found on limestone pavement. Geologically the pavements

display a good range of attractive and interesting features including sloping pavement surfaces, runnel networks and large clints. The area is crossed by a number of public footpaths.

An active limestone quarry (excluded from the Order) has removed a large part of the hill on the north side, including an unknown amount of limestone pavement. The total area covered by the Order is 42.3 hectares.

SCHEDULE

The pavement is situated in the Arnside-Silverdale AONB approximately 1 km. north of Silverdale and 2 km. south of Arnside. It adjoins the Cumbria-Lancashire County boundary and the Eaves Wood Limestone Pavement Notification Area in Lancashire. The pavement lies mainly on the plateau of a low but prominent wooded hill (Middlebarrow Hill). The eastern side of this hill contains a larger active quarry (excluded from the Order) which has totally removed a substantial proportion of the hill, including some limestone pavement. Middlebarrow Plain on the west now forms part of a large caravan park. Extensive outcrops of pavement, some predominantly open in character and some wooded, lie on either side of a stone wall dissecting the two areas. The patterns of open pavement, woodland and glades form a varied and attractive landscape. There is also an isolated long, narrow exposure of pavement adjacent to the caravan site entrance and adjoining mini-golf course. Floristically the pavements are amongst the best in the Arnside/Silverdale area and contain one nationally rare and several uncommon species. Geologically the site also contain good examples of typical limestone pavement features. Two well used public footpaths linking Arnside and Silverdale traverse the area while informal paths in the woodland are well used by visitors to the caravan site. Existing trees in the area are protected under a Tree Preservation Order. The adjacent Eaves Wood belongs to the National Trust and provides unrestricted public access. The total area covered by the Order is 16.3 ha.
