This notice affects consumers of Sutton and East Surrey Water plc in the Horley, Reigate, Edenbridge, Lingfield and surrounding areas supplied by the Bough Beech Water Treatment Works.

TELECOMMUNICATIONS

Proposed Modifications of the Licence of Mercury Communications Limited (Mercury)

1. The Director General of Telecommunications (the "Director"), in accordance with section 12(2) of the Telecommunications Act 1984 (the "Act"), hereby gives notice that he proposes to make modifications on the licence to Mercury Communications Limited on 5th November 1984 (the "Mercury Licence").

2. The principal modifications which the Director proposes to make are described in the Schedule below. The Director also proposes to make a number of minor and consequential modifications for the purposes of the principal proposed modifications.

3. The Director proposes to make the modifications described in the Schedule. A review of Mercury's licence concluded that certain conditions are obsolete, that others are not appropriate to a non-dominant operator and that obligations in Mercury's licence requiring advance publication of charges operate too harshly given Mercury's non-dominant position in most markets overall. He

proposes that Mercury be subject to a requirement of effective day publication of charges. It is also proposed that the interconnection and Associate conditions should be brought up to date.

4. The Director is required by section 12(2) of the Act to consider any representations or objections which are duly made and not withdrawn. Following consultation and Mercury's agreement with them, the Director proposes to make the modifications forthwith.

5. The consultation procedure comprises two stages. In the first stage, representations on or objections to the proposed modifications may be made to David Naylor, OFTEL, 50 Ludgate Hill, London EC4M 7JJ (telephone 0171 634 8708) no later than 31st May 1996.

Any confidential material should be clearly marked as such and separated out into a confidential annex. All representations or objections received by OFTEL, with the exception of material marked confidential, will be made available for inspection in OFTEL's library. OFTEL encourages interested parties to place the non-confidential parts of their representations, objections and comments on their own Internet pages, in addition to sending OFTEL a hard copy. Comments on this document (if they are relatively short) can also be sent to OFTEL at the following e-mail address: press.office.ofel@gnet.gov.uk.

6. In the second stage of consultation, interested parties are invited to send comments to OFTEL no later than 14th June 1996, on the representations and objections received in the first stage. Copies of the proposed modifications can be obtained from Niall Horgan at the above address (telephone 0171 634 8862).

SCHEDULE

Proposed principal modifications of conditions of the Mercury licence

1. Deletion of outdated conditions

It is proposed to delete the following conditions which are now no longer necessary.

Condition 6—Calls made by emergency organisations. The Condition requires Mercury to have operators to connect calls in circumstances when they cannot be dialled direct. Because it is now possible to direct dial emergency organisations, the condition is redundant.

Condition 30—Numbering arrangements. This has been superseded by Conditions 30A and 30B to Mercury's licence.

Condition 36A—Requirement to provide means of access to the Applicable Systems. This condition imposes an obligation on Mercury to provide access to its Applicable Systems, in conformity with certain standards which have now been superseded.

2. Deletion of conditions inappropriate to an operator in Mercury's position

There a number of conditions which are unnecessary for an operator such as Mercury. They are not found in licences granted to other operators in a comparable position to Mercury. In view of Mercury's market position overall it is reasonable that it should be put on the same footing as other comparable operators. The conditions to be deleted currently provide as follows:

Condition 9—Priority fault repair service. This requires Mercury to offer a priority fault repair service to particular groups of customers.

Condition 17—Prohibition on cross-subsidies. This gives the Director a power to control unfair cross-subsidies to Mercury's apparatus supply, production, and supplemental services businesses.

Condition 19—Separate accounts for certain activities. This requires the keeping of separate accounts for Mercury's apparatus supply business, its systems business and its supplementary services business.

Condition 20—Apparatus production. This requires any apparatus supply business which Mercury may have to be a separate subsidiary.

Condition 21—Prohibition of preferential treatment. This condition requires Mercury's systems business not to give preferential treatment to any apparatus supply business which it may have.

Condition 32—Prohibition of certain exclusive dealing arrangements. This condition would impose certain requirements on Mercury if it were deemed to be a Monopoly Purchaser of telecommunications apparatus.

Condition 36—Prohibition of non-statutory testing arrangements. This condition prevents Mercury from imposing tests on apparatus to be connected to its network, over and above those required for apparatus approval under the provisions of the Act.

Condition 37—Statutory testing. Mercury does not undertake statutory testing (and never has). Nor does it have any plans to enter this area of work.

Condition 38—Limitations on integrated wiring situated on served premises. This condition prevents Mercury from installing its wiring in such a way as to prevent work on other systems installed on the premises. It is intended to prevent a dominant operator using its position to distort the apparatus (i.e. wiring) supply and maintenance markets. These issues are now covered in the OFTEL Wiring Code.

Condition 39—Wiring, etc. not forming part of the Applicable Systems. This condition seeks to ensure that, in installing lines, Mercury does not favour its own businesses (apparatus supply and maintenance) at the expense of third-party suppliers.

Condition 40—Limitations on certain maintenance arrangements. This condition covers the publication of charges, terms and conditions for maintenance services which the customer can only get from Mercury.

Condition 45—Pre-notification of joint ventures. This condition requires Mercury to notify the Director General of certain agreements or arrangements.

3. Effective day publication

Condition 15—Publication of charges, terms and conditions. This condition at present requires Mercury to publish and notify the introduction of changes to tariffs 28 days in advance. Following the Post Duopoly Review in slimline of PTO licences a licensee only has to publish its tariffs once the licensee is deemed a "well established operator", having attained a 25 per cent. share of the market for a given telecommunication service. Whether this regime should continue to apply, or should only apply to some of Mercury's tariffs,

will be the subject of a later decision. In the meantime, it is proposed to remove the requirement that Mercury gives 28 days notice of a price change, which fetters Mercury's ability to compete with other operators on an equal footing. The proposed amendment to Condition 15 would therefore require publication and notification to OFTEL only on the day on which the tariff becomes effective i.e. when services are supplied under it.

4. Conditions requiring updating

Condition 12—Connection of systems providing connection services. It is proposed to amend this condition, which provides for the Director-General to review interconnection agreements. At present this condition gives the Director General a role in determining interconnection issues not agreed between the two parties before the interconnection agreement has been signed. The licence does not however empower the Director to determine any issues which are subject to disagreement after the agreement has been signed and which arise on review unless the Director General has determined the review clause of the interconnect agreement prior to its signing. The proposed licence modification is very similar to that already made to BT's licence, and tracks the change which OFTEL intends to make to all other slimline PTO licences.

Condition 47—Associates. Since the grant of Mercury's licence, this condition, which is standard to most licences has been revised to strengthen the Director's power to deal with attempts to avoid a licensee's obligations under its licence by going through another member of the corporate group to which the licensee belongs.
