DEPARTMENT OF THE ENVIRONMENT

WATER INDUSTRY ACT 1991

Consumers in some areas supplied by Three Valleys Water PLC who might be affected by improvement work being carried out by the Company will wish to be aware of the following information.

The Company has found through its water quality monitoring programme that water received by consumers in these areas fails on occasion to meet the standards, for certain parameters (normally those associated with occasional occurrences of discoloured water), as required by the Water Supply (Water Quality) Regulations 1989, because of deficiencies in the distribution system. These failures do not make the water unsafe to drink at any time.

The former Companies of Three Valleys Water PLC gave legally binding undertakings in 1990 to carry out appropriate remedial

work, as the first stage of a long term programme, to refurbish affected parts of the distribution system.

The Secretary of State for the Environment reviewed these undertakings and concluded that whilst the Company had taken action to discharge its duties in respect of the undertakings, the steps in the undertakings no longer remained the most appropriate for the Company to take to achieve compliance with the standards for the particular parameters.

Consequently the Secretary of State required the Company to give a new undertaking containing appropriate steps to carry out further remedial work as the next stage in the programme of improvement.

Following detailed discussions with the Drinking Water Inspectorate the Company has given a new undertaking on 29th May 1996 and the Secretary of State has informed the Company that he is satisfied the Company is complying with this new undertaking by serving on them the notice below:

The Secretary of State for the Environment:

Is satisfied that Three Valleys Water PLC (the Company) in supplying water in 31 supply zones has contravened and is likely to do so again its duty to supply wholesome water under section 68(1)(a) of the Water Industry Act 1991 (the Act) and the requirement of regulation 3(3)(c) of the Water Supply (Water Quality) Regulations 1989 that the water supplied should not contain concentrations or values of the parameters in Tables A to C of those Regulations in excess of the prescribed concentrations or values.

Has notified the Company on 31st March 1993 he is considering making in relation to the Company an enforcement Order under section 18 of the Act.

Notes that the Company has on 29th May 1996 given a new undertaking under section 19(1)(b) of the Act to take the following steps specified in the Schedule of Works by the dates shown:

(a) Submit to the Secretary of State the Company's strategy for improving the performance of its distribution system. To be completed by 31st May 1996.

(iii) prioritise and programme the execution of remedial measures. To be completed by 31st March 1999.

(c) Submit to the Secretary of State a statement of the current situation and remedial action taken and required in the zones identified in the annex to this Schedule. To be completed annually by 28th February.

(d) Submit to the Secretary of State the Company's programme for the execution of remedial measures. To be completed annually by 28th February.

(e) Renovate (i.e. replace or reline) a total of 363 km of the distribution system. This renovation is to be carried out according to the priorities identified by the Company's strategy, zone action statements and programme referred to in (a), (c) and (d) above and as summarised in the annex to this Schedule. (f) Submit a further draft Undertaking to the Secretary of State to complete any remaining renovation work consistent with an up to date Company strategy, zone action statements and programme. To be completed by 31st March 1999.
