## WATER RESOURCES ACT

### ENVIRONMENT AGENCY

#### *Notice of application to vary a licence to abstract water*

Take notice that Blankney Estates Limited, of Estate Office, Blankney, Lincoln LN4 3AZ, is applying to the Environment Agency to vary the following licences.

#### BLANKNEY ESTATES LIMITED

#### *Irrigation Review and Environment Policy*

Blankney Estates Limited at present have a number of irrigation licences serving various parts of the area of land farmed between Blankney and Navenby. It is intended to develop an integrated system which will eventually have the facility to irrigate a substantial proportion of the land farmed. The emphasis will be on winter water stored when flows are high for use during the summer. To achieve these aims the following will be required:

- (1) All licences currently held (see Appendix 1) and any new licences issued in the future to relate to all land farmed by the Blankney and Navenby farms. (See Appendix 5. Map.)
- (2) Any licence where the water is abstracted and fed to a reservoir may be fed to any of the reservoirs on the system. (See Appendix 2.)
- (3) Replace existing 1 million gallon reservoir at Navenby with new reservoir holding approximately 6 million gallons. Lining of existing reservoir nearing end of working life and will need replacing.
- (4) Extend pipeline from either Metheringham Lodge or Blankney Grange to allow water to be pumped to Navenby reservoir.
- (5a) Apply to alter licence from bore holes 4/30/9/G128 to allow water to be pumped first into reservoirs before being pumped to fields for spray irrigation.
- (5b) Apply to alter licence 4/30/9/G11 to fill new reservoir at Navenby during winter months when water levels are much higher.
- (6) Apply for increase on licence 4/30/9/S153 for additional 15 million gallons of winter water extraction from Waneham Beck into reservoirs.
- (7) The following licences (see Appendix 3) have been recently revoked by Blankney Estates. These are mainly for summer abstraction. Total 11,687,980 gallons (53,127 cubic metres).
- (8) Trial and if successful purchase boom irrigators for use on flat fields.

Implementing these proposals will lead to the following environmental benefits:

- (1) Having the capacity to irrigate specialist crops such as potatoes, sugar beet, grass for drying and vining peas over a larger area means that these crops can be grown on a wider rotation. This allows a less intensive use of inputs.
- (2) Greater use will be made of water collected in winter and then stored. This water would in most cases have otherwise run off the aquifer.
- (3) Having looked at the Waneham Beck flow figures the proposal for extra winter abstraction should not in most years cause any problem and we are not aware that any users downstream of our abstraction point would be disadvantaged, subject to lowflow control.
- (4) By revoking the old licences and integrating all the remaining licences into one irrigation system, it will greatly assist the Environment Agency in the administration of these licences and it will ease the management of the system for Blankney Estates Limited.
- (5) Boom irrigators increase the efficiency of water use.
