ENVIRONMENT AGENCY—SOUTHERN REGION

Notice of applications for consent in pursuance of section 88 and Schedule 10

Notice is hereby given, in accordance with section 88 and Schedule 10 of the Water Resources Act 1991, that applications have been made to the Environment Agency (Southern Region) by Southern Water Services Ltd for consent to discharge sewage effluent to the North Sea as a result of the proposed Margate and Broadstairs Wastewater Scheme.

Application A785/K/97, for Margate Wastewater Treatment Works, Foreness Point, Margate, Kent, proposes that a wastewater flow of up to 535 litres per second from the Margate and Broadstairs catchment will receive preliminary treatment (screening and grit removal) and primary treatment (settling) before discharge through the existing 1.9 kilometre long sea outfall at National Grid Reference TR 3885 7346. When wastewater flow to the treatment works exceeds 535 litres per second the excess flow, up to a maximum of 565 litres per second, will receive preliminary treatment but bypass primary treatment before being discharged through the long sea outfall. When flow to the works exceeds 1,100 litres per second (the capacity of the long sea outfall) the excess flow will be discharged, after screening, through the twin storm outfall at National Grid Reference TR 3855 7212. In the event of an emergency caused by failure of the works inlet screw pumps wastewater will discharge through three short outfalls in the sea wall at National Grid Reference TR 3843 7163.

Application A786/K/97, for Broadstairs Marine Treatment Works, North Foreland, Broadstairs, Kent, proposes that a wastewater flow to the works of up to 144 litres per second, currently discharged to the North Sea after preliminary treatment, will be pumped to Margate Wastewater Treatment Works. When the flow to the works exceeds 144 litres per second the excess flow, up to a maximum of 233 litres per second, will after preliminary treatment be discharged to the North Sea through the existing 3.6 kilometre long sea outfall at National Grid Reference TR 4334 7121. When the flow to the works exceeds 377 litres per second (the capacity of the long sea outfall) the excess flow will be discharged to the North Sea via a twin storm outfall; this is current practice and is covered by an existing discharge consent. In an emergency caused by failure of the transfer and long sea outfall pumps, wastewater will be discharged to the North Sea via the twin storm outfall at National Grid Reference TR 4062 6987.

The above applications have been submitted as a result of an improvement scheme, agreed in principle with the Environment Agency, to achieve compliance with the Urban Waste Water Treatment (England and Wales) Regulations 1994.

Any person wishing to make representation about these applications should do so in writing to the Area Environment Planning Manager, Environment Agency, Orchard House, Endeavour Park, London Road, Addington, West Malling, Kent ME19 5SH, not later than 28th November 1997. A copy of the applications may be inspected, free of charge, at the above address and also at the offices of the Environment Agency at Sturry Road, Canterbury, Kent CT2 0AA, at all reasonable hours.

Royal Mail customers who already use one of the listed franking machine models will have until 30th September 2002, to replace it with one that does meet the new approval standards.
