(b) If the date in paragraph 5 above is on or after 1st April 1994, then only Power Band A shall be completed and if the said date is on or after 1st April 1998, then this paragraph will cease to have effect

(B) Exceeding 0.1 MW but not exceeding 1.0 MW		Not applicable	

- 8 A description of the system of electric lines and electrical plant by means of which the applicant intends to supply electricity, indicating which plant and lines are to be constructed and which are existing plant and lines, and further identifying any parts of that system which will not be owned by or otherwise in the possession or control of the applicant

The applicant will supply power generated by it at Lots Road and Greenwich generating stations, and which will be distributed via an 11kV network owned by London Underground Limited (LUL), use of which will be granted to the applicant under the terms of a contract to be entered between LUL and the applicant under which the applicant will own, operate, maintain and finance the network for the 30 year contract duration

- 9 A statement of the extent (if any) to which the applicant considers it necessary for powers under Schedule 3 (compulsory acquisition of land etc.) and under Schedule 4 (other powers etc.) to the Act to be given through the licence for which he is applying

The applicant considers it necessary for the powers under Schedule 3 and under Schedule 4 to the Act to be given throughout the licence for which it is applying for the following reasons

The applicant intends to enter into a contract (the Power Service Contract) (PSC) with LUL under which the applicant will own, operate and finance the generation and high voltage network now owned by LUL for the 30 year duration of the PSC

The PSC imposes on the applicant obligations inter alia to supply electricity generated by the applicant at the generating stations to LUL and to repair and maintain substation properties and the generating stations

LUL will grant a licence to the applicant to maintain, repair, etc. and gain access to the cables forming part of its network. The cables and the ducts within which the cables are run are either in the land of third parties or in public land

Ownership and operation of the network for the contract duration will not be possible if properties and/or rights hitherto own/exercised by LUL cease to be available to the contractor at any time during the contract duration

The retention and acquisition of property and rights for the operation of the network are integral to the provision of a comprehensive railway network. The maintenance of that network may be prejudiced by the absence of the statutory powers from the applicant's licence

- 10 Details of any licences held, applied for or being applied for by the applicant in respect of the generation, transmission or supply of electricity

The applicant is also applying for a generating licence to operate the generating stations at Lots Road and Greenwich, London

- (i) conferring any right to share in the profits or liability to contribute to the losses of the applicant,
 (ii) giving rise to an obligation to contribute to the debts or expenses of the applicant in the event of a winding-up

NOTE 2

The description should enable the areas, location or premises concerned to be adequately and readily identified, by map if the applicant so desires or by any other convenient means. The following examples of descriptions that might be used are not exhaustive and are by way of illustration only. The area of premises might be identified by the name of the customers and/or normal postal address of the premises to be supplied, described by reference to a named street or road, town, city, village, parish, county or other accepted boundary, such as a Local Authority Area, or described by reference to certain other characteristics such as the type of premises or the maximum electrical demand to be met at those premises

NOTE 3

- (a) For premises already receiving electricity for a period in excess of 12 months, whether from the applicant or anyone else, maximum demand shall be calculated as the average of the three highest monthly maximum demands in the preceding 12 months, or
 (b) for premises not already so receiving electricity, maximum demand shall be calculated as the average of the three highest monthly maximum demands which might reasonably be expected by the applicant to be supplied in the first 12 months of supply
