##### INTEGRATED POLLUTION CONTROL

Notice is hereby given that Fibrogen Limited has applied to the Environment Agency for an Integrated Pollution Control (IPC) authorisation to operate a waste incineration process at Flixborough, near Scunthorpe in North Lincolnshire.

The Company's application involves proposals to incinerate meat and bone meal (MBM) from the governments over thirty months scheme (OTMS) at Glanford Power Station. OTMS MBM will replace poultry litter as the stations main fuel. The OTMS is one of several Government schemes which were put in place in 1996 to restore public confidence in British beef and to help lift the beef export ban. Only cattle which are over thirty months of age and which show no clinical signs of BSE may enter the OTMS. The aim of the scheme is to prevent products derived from cattle over thirty months of age entering the human or animal food chains as a purely precautionary measure, and to compensate farmers for the effective loss of value of their animals as a consequence. Most of the animals entering the scheme are rendered to produce two products, MBM and tallow, which are being safely stored pending destruction. The application details the modifications to the existing plant and equipment proposed for the incineration of MBM, and the techniques which will be used to minimise and render harmless releases from the process.

A copy of the above application can be inspected by members of the public, free of charge, on the public registers held at the following locations

Environment Agency Trentside Offices, Scarrington Road West Bridgford, Nottingham NG2 5FA

Environment Agency, Kingfisher House, Goldhay Way, Orton Goldhay, Peterborough PE2 5ZR

North Lincolnshire Council, Church Square House Church Square, 30-40 High Street, Scunthorpe DN15 6NL

Members of the public who wish to obtain a copy of the application, or any part of it or any other relevant information held on the registers, will be able to do so on payment of a reasonable charge to cover the costs of copying, either when attending a public register office in person, or on written request to the Environment Agency's address below.

In addition, a consultation document outlining the content of the application and other relevant matters is available on the public registers at the locations given above, or on written request to the Environment Agency at the address below.

Members of the public may, additionally, like to note that the Agency intend to hold a public meeting with regard to this application during February 1999. The details of which will be available from the Agency's address below and will be publicised when they have been finalised. The Agency have formally requested further information from Fibrogen in support of their application. Fibrogen intend to supply this information to the Agency by 15th January 1999. The information is likely to be publicly available from 22nd January 1999.

Representations on the IPC application should be made in writing to the Environment Agency at the address given below within 28 days from the date of this public notice. Whilst the Agency will consider representations received beyond the 28 day period, members of the public should note that the Agency is required to determine this application by 1st April 1999 (unless an extension of time is agreed by Fibrogen Limited) and, therefore it may not be possible for very late representations to be considered.

Any representations received will be entered on the public registers unless the person making representations requests in writing that they should not be so entered. If such a request is made, the register will only include a statement that representations have been made which have been the subject of such a request.
