PUBLIC NOTIFICATION OF AN APPLICATION MADE UNDER SECTION 11 OF THE ENVIRONMENTAL PROTECTION ACT 1990 PART 1

INTEGRATED POLLUTION CONTROL

Notice is hereby given that The Rugby Group PLC ("Rugby Cement") has applied to the Environment Agency for a substantial variation to its Integrated Pollution Control (IPC) authorisation to operate a cement manufacturing process at Barrington near Cambridge

Rugby Cement's application involves a proposal for the use of a substitute liquid fuel called Dycal in place of up to 40 per cent of the conventional fuel presently in use namely coal and petcoke. The process already uses up to 40 per cent of a substitute liquid fuel and this will continue. Dycal is a by-product from the manufacture of nylon and comes from a manufacturing process regulated by the Environment Agency. It contains extremely low levels of sulphur and chlorine compared with conventional fuels at Barrington, and contains similar overall levels of metals. It is described more fully in the application. Its suppliers do not regard Dycal as a waste. Dycal is currently in use at Rugby Cement's works at Southam at a daily average of up to 40 per cent substitution. Its use there results in a significant reduction in the overall impact of the cement works on the environment and a similar improvement is expected at Barrington Works.

Rugby Cement proposes to carry out a comprehensive programme of monitoring of the relevant releases from the process and this is expected to take several months. The results of this monitoring will be made available to the public.

A copy of the above application can be inspected by members of the public, free of charge, on the public register held at the following locations: The Environment Agency, Anglian Region, Kingfisher House, Goldhay Way, Orton Goldhay, Peterborough PE2 5ZR and South Cambridgeshire District Council, Council Offices 9-11 Hills Road, Cambridge CB2 1NL (507)
