Amerada Hess Limited

Pursuant to regulation 5(8) of the above Regulations, the Secretary of State for Trade and Industry gives notice that, being content that the requirements of the above Regulations have been satisfied, he has, pursuant to Licence PO16, granted a consent to Amerada Hess Limited to the drilling of an appraisal well in block 47/3 a. The consent for well 47/3a-K took effect from 13th December 2000.

Amerada Hess proposes drilling an appraisal well in block 47/3a-K, in a water depth of 40 metres, 30 kilometres off Flamborough Head. During the EIA process, Amerada Hess Ltd. (AHL), identified four aspects of the proposed operation having the most potential to cause environment impact: physical presence of the rig and associated vessels 30 kilometres from the coast; discharge of drilling cuttings and chemicals; atmospheric emissions from power generation and well testing (if undertaken); cumulative effects. Drilling operations will involve the use of water based muds, and it is unlikely that any impact on benthic fauna would be detected outwith 50 metres of the drill site, considered in the ES as insignificant. During well testing, a green burner will be used, ensuring that should any hydrocarbon liquids be produced, drop-out to the sea will be minimised. The jack-up drilling rig will be on location for approximately 60 days, consequently curtailing impacts from physical presence and atmospheric emissions. Bunkering of diesel will take place during day-light hours and under constant supervision, for minimise risk of oil spillage, and a comprehensive oil spill contingency plan will be in place. The ES presents a detailed account of all environmental impacts associated with the development. No significant impacts have been identified from the proposed development activities and they are unlikely to affect any possible future offshore SAC that may be identified in the area. The JNNC and MAFF have no objections.

The Secretary of State is of the view, having regard to the environmental statement prepared in respect of the well and the comments received from those consulted, that the project is not likely to have a significant effect on the environment. The environmental statement adequately assessed the potential environmental impacts of drilling in a sensitive area and showed that all necessary contingency measures will be put in place.
