NOTICE UNDER SECTION 11(2) OF THE ELECTRICITY ACT 1989

The Gas and Electricity Markets Authority ("the Authority") hereby gives notice pursuant to section 11(2) of the Electricity Act 1989 ("the Act") as follows:

1. The Authority proposes to modify the conditions of the transmission licence granted to The National Grid Company plc ("NGC") under section 6(1)(b) of the Act by introducing the following licence conditions and Schedule provisions:

(1) Special condition AA4: Licensee's Procurement and Use of Balancing Services;

(2) Special condition AA5: Revenue Restriction Conditions: Definitions;

(3) Special condition AA5A: Revised Restrictions on Revenue—paragraphs 5–12 inclusive of that special condition;

(4) Special condition AA5E: Duration of the Transmission Network Revenue Restriction and the Balancing Services Activity Revenue Restriction; and

(5) Schedule A Part B Terms used in the balancing services activity revenue restriction,

in substitution for the existing special licence conditions and Schedule provisions bearing these numbers and titles which shall be deleted.

2. The reason why the Authority proposes to make the licence modifications appearing in paragraph 1(1) above is to ensure that the process for reviewing and revising the statements prepared by NGC referred to in the proposed special condition AA4 can, where relevant, occur within a formula year and that the process is consistent for all the relevant statements.

3. The reason why the Authority proposes to make the licence modifications appearing in paragraphs 1(2)–(5) inclusive and their effect were published by the Authority in the following documents:

(a) Initial proposals—"NGC system operator incentive scheme from April 2002, Initial proposals", Ofgem, December 2001; and

(b) Final proposals—"NGC system operator incentive scheme from April 2002, Final proposals", Ofgem, February 2002.

4. In summary, the effects of the proposed licence modifications are as follows:

(a) *Proposed licence modifications relating to proposed special condition AA4*

The proposed amendments seek to create a consistent review and revision process for the statements which NGC is obliged to have in place in accordance with special condition AA4. Additionally, the proposed amendments ensure that the special condition AA4 statements prepared by NGC can, where relevant be reviewed within year following a consultation period with Balancing and Settlement Code Parties of at least 28 days.

(b) *Proposed licence modifications relating to proposed special conditions AA5, AA5A paragraphs 5–12 inclusive, AA5E and Schedule A Part B*

The proposed amendments seek to revise the relevant sections in order to accommodate the final proposals relating to the NGC System Operator ("SO") incentive scheme from April 2002.

The NGC SO incentive scheme to run from 1 April 2002 until 31 March 2003, is a rollover of the current scheme, substantially in its present form, but including specific adjustments. The incentive scheme parameters are set out in the table below:

	<i>Final Proposals</i>
Incentive scheme target	£460 million
Upside sharing factor	60%
Downside sharing factor	50%
Cap	£60 million
Collar	–£45 million

The final proposals also expose NGC to a potential increase in system operation costs associated with BSC or CUSC modifications, as of 1 February 2002, being consulted on by the BSC or CUSC panels and which may be implemented in the future following a decision by the Authority. The inclusion of this allowance is made without prejudice to the Authority's decision in respect of these modifications. The utilisation of the allowance will be taken into account at the next periodic review of NGC's SO incentives (2003/04).

The net imbalance volume reference price (NIRP) and the transmission losses reference price (TLRP) are to be redefined in line with the final proposals. NIRP is to be a dual price system based on a defined basket of market prices and the variable price adjustment values are to be set at 1.5 when the system is short and 0.5 when the system is long. TLRP is to be set at £18.50/MWh. The redefinition of both the NIRP and TLRP terms are included in the proposed licence amendments.

In addition, the proposed amendments seek to modify the upside and downside sharing factors relating to the incentive payments on internal costs in respect of the relevant years commencing on 1 April 2002, 1 April 2003, 1 April 2004 and 1 April 2005. The proposed licence amendment aims to set the internal costs incentive scheme sharing factors for these years equal to the proposed external costs incentive scheme sharing factors for the relevant year commencing on 1 April 2002.

5.
