WATER RESOURCES ACT 1991, AS AMENDED BY THE ENVIRONMENT ACT 1995, SCHEDULE 10

NOTICE OF APPLICATION FOR CONSENT FOR THE PURPOSES OF SECTION 88

Notice is hereby given, in accordance with Schedule 10, section 4 of the Water Resources Act, 1991, that an application has been made to the Environment Agency by United Utilities Water PLC for the variation of consent 016940005.

The application is part of an improvement programme located at Hale Wastewater Treatment Works, south of Hale, near Ashley Green. The improvement involves the variation of an existing discharge consent for a continuous discharge of treated sewage effluent, intermittent settled storm sewage and intermittent storm sewage. This existing outfall discharges to the River Bollin at National Grid Ref SJ 7734 8564. The change involves removal of the continuous discharge by transfer to Davyhulme Wastewater Treatment Works via a pumping station that would require an emergency overflow discharge. Provisions are in place to avoid the occurrence of emergency overflows during pumping station failure. These include a permanent stand-by generator, stand-by pumps (which will automatically activate when the duty pump fails), storage, telemetry and tanker access for rising main failure. The settled storm sewage and storm sewage overflows will continue to be discharged intermittently to the River Bollin when the flow in the sewer exceeds the maximum rate of transfer to Davyhulme WwTW (110 litres per second). The volume of storm sewage discharged is rainfall dependent. Incoming flows between 110 and 295 litres per second would receive settlement in storm tanks before discharging as in the previous situation. Flows in excess of this will be screened via a Combined Sewer Overflow screen and discharged directly to the River Bollin via the current discharge point. Screening provides solids retention such that any discharge from the overflow will not contain a significant quantity of solid matter greater than 6mm in more than one dimension. Telemetry will also be installed and will be provided for power or screen failure.

Any person wishing to make representations about the application should do so in writing to: Environment Agency, Planning & Customer Services, Appleton House, 430 Birchwood Boulevard, Warrington WA3 7WD, not later than 29 December 2003, quoting Ref S/175/P/2003/v.

A copy of the application may be inspected, free of charge, at the above address during office hours, Monday to Friday, 9.00 am to 5.00 pm.

NOTICE OF APPLICATION FOR VARIATION OF A CONSENT TO DISCHARGE

Notice is given, as required by Schedule 10 of the Water Resources Act 1991, that the following application has been made to the Environment Agency, South West Region.

South West Water Limited has applied for the variation of an existing Consent to Discharge, from Brushford Sewage Treatment Works (STW) at Brushford, Somerset. The flow to the STW has increased due to development in the area since 1968. Due to this increase, the STW is being improved in line with the National Environment Programme, with an increase in flow to full treatment and increased storm storage.

It is proposed that the STW will treat flows by way of biological treatment. At the inlet to the STW a pumping station is proposed that will have a storm and emergency overflow. Emergency overflow operation will only occur as a result of mechanical or electrical failure. The storm overflow will only operate in storm conditions.

The pumping station will be equipped with back-up pumping and power facilities and will have emergency and storm storage in order to minimise the possibility of a storm or emergency discharge.
