Environment Agency—South West Region**WATER RESOURCES ACT 1991, SCHEDULE 10 (AS AMENDED BY THE ENVIRONMENT ACT 1995)****NOTICE OF APPLICATION FOR VARIATION OF A CONSENT TO DISCHARGE**

Notice is given as required by Schedule 10 of the Water Resources Act 1991, that the following application has been made to the Environment Agency, South West Region.

South West Water has applied for the variation of an existing Consent to Discharge from Dunkeswell Sewage Treatment Works at Dunkeswell, near Honiton, Devon.

The Environment Agency identified the existing storm discharge at Dunkeswell Sewage Treatment Works (STW) as in need of improvement. In assessing the site in order to comply with European legislation and Environment Agency policy, South West Water has found that the flows to the STW have increased over time. Therefore, an application for a variation to the existing final effluent consent has been made.

The improvement scheme proposed for Dunkeswell STW comprises of an increase in the amount of flow passed to biological treatment, the installation of a storm storage tank, and a reduction in the amount of screened storm sewage being discharged.

The existing screened storm sewage discharges to the Dunkeswell Stream. It is proposed that this discharge will be relocated to discharge to the Madford River, where there is higher dilution. From the new

storm tank, settled storm sewage will be discharged to the Madford River, an existing consent for the STW will be modified to cover this discharge.

The proposed scheme will remove the unsatisfactory storm discharge to the Dunkeswell Stream, and the increase in flow to full treatment and storm storage will minimise storm discharges to the Madford River.
