Welsh Assembly Government

SWANSEA TO MANCHESTER TRUNK ROAD (A483) FOUR CROSSES IMPROVEMENT

ENVIRONMENTAL IMPACT ASSESSMENT DETERMINATION BY THE NATIONAL ASSEMBLY FOR WALES UNDER SECTION 105(A) OF THE HIGHWAYS ACT 1980

The Minister for Enterprise, Innovation and Networks, acting on behalf of the National Assembly for Wales ("the National Assembly") is considering whether to proceed with the above project for improving a highway for which it is the highway authority.

The project involves the construction of a highway improvement on the A483 at Four Crosses. The project will provide a new alignment to modern standards on an off-line route thereby improving highway safety and enhancing the village environment.

This is a 1.4 km improvement designed primarily to upgrade the current alignment, which presently runs through the built up environment of the village. The new road will consist of a single 7.3 metre carriageway with 3.5 metre verges inclusive of a 1 metre hard strip. The new carriageway will follow a south-north alignment starting 340 metres south of the existing Inn Crossroads where the B4393 forms a junction with the trunk road. The new alignment will incorporate a roundabout to cater for the east-west class II road. It then continues northwards and ties in to the existing A483 carriageway near the church of St Tysilio. This improvement is mainly off-line and has been designed to incorporate new horizontal and vertical elements to improve safety for all users.

It has been determined by the National Assembly that the project is a relevant project within Annex II to European Council Directive 85/337/

EEC ("the Directive") as amended by European Council Directive 97/11/EC, and that it should be made subject to an Environmental Impact Assessment in accordance with the Directive.
In accordance with the above determination an Environmental Statement has been prepared.
Description of local environment:

The local environment consists of the following features:

1. Rural Settlement: The settlement at Four Crosses is built on both sides of the trunk road with most of the development situated to the east. Residential and commercial properties exist adjacent to the A483 Trunk Road. Commercial properties include two public houses, a service station with mini supermarket, a shop and post office, veterinary surgery, doctors surgery and a fish and chip shop. There is also the Llandysilio CW Primary School and St Tysilio's church adjacent to the trunk road. The project will involve the demolition of disused farm outbuildings.
2. The Montgomery Branch of the Shropshire Union Canal (SSSI and SAC): The Montgomery Canal lies to the west of the preferred route at a distance of 300 metres. It forms a linear ecosystem and carries the national designation SSSI and SAC for its population of floating water plantain. A Statement to Inform an Appropriate Assessment has not been produced because it is considered sufficiently distant from the proposed development that no impacts would result from the proposal (refer to the A483 Four Crosses Environmental Statement, Section 4—Ecology & Nature Conservation).
3. Cultural Heritage: The route of the improvement covers a landscape with widespread, varied and complex archaeological features. The Four Crosses War Memorial is a Category "A" archaeological feature (of national importance) and will be affected by the proposal. Detailed studies of the route corridor have been undertaken by means of excavation, but it is considered there is the possibility of further underground features, which remain undiscovered.
4. Rights of Way: There is an extensive network of public rights of way in the route corridor. The alignment of the preferred route severs two public footpaths and the Offa's Dyke Path National Trail.
5. Ecology: Surveys for protected species found evidence of extensive badger activity along the route corridor. The preferred route severs badger territory. No evidence of bat roosting was found in the mature trees along the route of the new highway. Four Red List bird species were found during the ornithological survey.
6. Landscape and Land Use: The area is largely flat with field hedges being the main defining element. There are no special or historic landscape designations.

Description of the main environmental effects of the project:

The Environmental Statement identifies the key environmental issues associated with the scheme namely:

Potential impact on buried historic features.
Direct impact on the Category "A" Four Crosses War Memorial.
Construction work impacts (eg noise, siltation, accidental spillage).
Demolition of farm outbuildings.
Severance of agricultural land and public rights of way.
Loss of habitat and disturbance to protected species. Two badger setts lie on the line of the proposed highway. The new highway has the potential to impact on bats and birds due to the loss of mature trees.
Adverse visual impact on the landscape. The new roundabout will have a significant visual impact by introducing an urban element into the existing rural landscape.
The proposal will cause significant severance of the field pattern.
The environmental impact assessment has indicated that up to six properties will potentially suffer adverse effects from increased traffic noise.

Description of the main mitigation measures proposed:

The Environmental Statement identifies the following main measures to be incorporated into the project in order to avoid, reduce or offset any adverse effects:

An archaeological watching brief will be implemented during earthworks, with adequate time allowed in the contract for excavation and recording of any relevant historical features uncovered.
Relocation of the War Memorial will be undertaken in a sensitive manner at an appropriate time of the year.
Restrictions will be imposed in the construction contract to minimise nuisances such as dust, noise and vibration.
There will be pre-construction ecological surveys to take account of any changed circumstances that may require modifications to the construction process or mitigation measures.
Enlarged culverts and mammal underpasses will be provided to permit the safe movement of protected species under the new road.
Disturbance to badger setts will be carried out at an appropriate time and under licence. Methodologies for licensed works that affect protected species or their habitats will be agreed with the Countryside Council for Wales; the issuing body for European Protected Species Development Licences.
Trees identified as being of potential use by bats will be removed only after further survey and at appropriate times. Potential loss of bat roosting will be offset by the provision of bat boxes to provide alternative roost sites, subject to landowners' agreements.
The removal of any trees, shrubs and hedgerows will not be permitted during the bird-nesting season.
A landscaped earth bund will be constructed along both sides of the new highway to avoid any adverse visual impact of the new road on residential properties. The bund will also provide a degree of traffic noise attenuation for these properties. The land outside the highway boundary will be returned to agriculture.
Where appropriate, field boundaries linking with adjoining hedges and woodland will be re-created by the provision of new hedges and the transplantation of existing hedgerows. This will help achieve the re-establishment of a logical field pattern shape.
The new roadside verges will be propagated with indigenous wild flowers and areas will be set aside for tree and tree block planting. Areas of tree and shrub planting both off-site and alongside the proposed improvement will help to screen views of the road and its traffic; and provide alternative habitat for protected species.
Properties potentially affected by an increase in traffic noise will be reassessed to determine whether they qualify for mitigation under the Noise Insulation Regulations 1975.
A pedestrian footway is to be provided in conjunction with a pedestrian underpass to link the de-commissioned A483 to the St Tysilio Church. This underpass will also accommodate the diverted Offa's Dyke Path National Trail.
Temporary measures to prevent the pollution of watercourses will be monitored and regularly inspected to ensure strict control of the local environment during the construction period, especially when undertaking the major earthworks.
Attenuation ponds will be constructed as part of the drainage system at the south and north ends of the scheme to regulate the flow of surface water into the local watercourses. The ponds will incorporate reed bed filtration and will be designed to enhance opportunities for wildlife habitat.
A flood storage compensation area is to be provided to the east of The Crest to offset any changes in the flood plain due to the construction of the new road at the northern tie-in.

Details of the scope and extent of the Environmental Impact Assessment (EIA) work undertaken and consultations with any principal council, the Countryside Council for Wales, CADW and the Environment Agency:

An Environmental Scoping Report was prepared for the scheme; the main purpose being to identify the significant environmental issues that may be present within the proposed route corridor. Consultations were made with the Environment Agency, Countryside Council for Wales and Clwyd Powys Archaeological Trust in June 1995. The National Assembly commissioned the Stage III environmental assessment in February 2004 to consider the environmental effects of the scheme. A phase 1 habitat survey and specialist species surveys were carried out in the first half of 2004.
The key statutory stakeholders, namely the Environment Agency, CADW, the Countryside Council for Wales and the Powysland Internal Drainage Board, have been consulted throughout the scheme development. A Public Exhibition was held in February 2005 to inform the stakeholders and local residents, obtain feedback regarding the ecological studies and agree the principles of mitigation measures proposed within the scheme.
Statement of Case in support of a Determination that Environmental Impact Assessment is required: The scheme is a relevant project as defined in the Environmental Regulations. It is located in a sensitive area and it has been determined that an EIA is required in accordance with the regulations. The Environmental Statement also contains information for the purposes of an Appropriate Assessment under Regulation 48(1) of the Conservation (Natural Habitats &c.) Regulations 1994 which describes the implications for the Sites and qualifying interests involved in view of those sites' conservation objectives. Copies of the Environmental Statement, the Non-Technical Summary together with the relevant plans and draft Orders relating to the project may be inspected free of charge at all reasonable hours until 29 December 2006, or within 6 weeks from the date of publication of this notice, whichever period shall expire later, at the offices of:

Welsh Assembly Government, Transport Wales, Transport Planning and Administration Division 3, Cathays Park, Cardiff.

Copies of the environmental statement can also be purchased on CD-Rom, price £45 by request.
