From Thursday, September 4 to Monday September 11 1671

Falmouth, September 4.

**T**He first instant arrived here the *Margaret* of *Leath* bound for *Burdeaux*, with several other Marchant men in her Company, bound for that and other Ports in *France*. The same day came into Port the *Crown* of *London*, bound for *Virginia*; Yesterday arrived in this Harbor about 40 Sayl of *Hamburgers*, under the Convoy of three men of War belonging to the same place, bound for *Cadix* and other Ports in the *Streights*.

*Tangier*, July 21. Here are at present in this Road the *Constant Warwick*, *Garland*, and *Rowbucke* Frigats, who, it is said, are to attend his Excellency the Earl of *Middletons* orders here. From *Texas* they write, of about 6000 Mores that were lodged near that place, with a design to attacke it, so soon as the rest of the Forces they expected were come to them.

*Naples*, August 19. Our Vice-Roy Don *Pedro d'Arragon* hath given orders for the shipping all the *Banditi* that are Prisoners here for *Spain*, to be from thence transported on the Fleet sitting out at *Cadix*, for the *West Indies*. The last week dyed here after some days illness the Count *de Mola*. From *Palermo* they write, that that Vice-Roy was perfectly recovered again, after having not without much danger, relapd into his former distemper, to the general joy of those people.

That all Barks and other Vessels laden with Corne, which touched at any Port in that Kingdom, were by his Excellencies order, obliged to sell their Corne there, by reason their harvest hath been very bad this year.

*Genoa*, August 19. At *Fosdinovo* is arrived a Commissary with about 60 Men, to take possession of the part of the Emperor of that *Marquise*, which the Great Duke of *Tuscany* upon the unfortunate death of those two Brothers, which happened some Months since, pretended to, and accordingly, sent a party of Men to hold it for him, till the matter should be otherwise determined, though we now hear, that upon the arrival of this Imperial Commissary, the Great Dukes Forces are withdrawn.

The Duke of *Savoie*, it is said, notwithstanding all the means that have been used to persuade him to admit of Signior *Durazzo*, in quality of Nuncio at his Court, continues resolved to the contrary, so that after all, it is thought, the said Nuncio will be forced to return again for *Rome*. We are told, of a promotion that is likely to be very suddenly at *Rome*, to fill up the two vacant places in the Sacred Colledge; but whilst there appear so many pretenders, and they with so much eagerness strive to make good their several pretences, it is thought, his Holiness may defer this promotion for some time.

From *Firenze* they write, of the extraordinary Feastings and other publick rejoynings, which have been there upon the occasion of the Great Dukes Birth day, which for several days together was celebrated with very great Solemnity. From *Milan* they tell us, that the Nobility and Clergy of those Countries continue much dissatisfied, in that they cannot procure of their Governour the disbanding of the new Troops, according to the Queen of *Spaines* directions.

*Hamburg*, September 8. On the 4 instant the Princess of *Dinemark* parted from *Alsen* by water to *Harburgh* (after having taken her leave there of the Queen her Mother, who returns from thence for *Copenhagen* again) accompanied by the Dukes of *Lunenburgh* and *Brunswick*, and several other persons of quality, where she arrived that Evening, and the next Morning proceeded from thence on her way to *Lunenburgh*; since which, came hither the Lant *Gravinne* Dowager of *Cassell*, with a very Noble Train on her journey to *Copenhagen*, where she goes to visit that Queen her Daughter, who is big with Child.

From *Stockholme* they write, that Monsieur *de Pomponne* the French Ambassador, notwithstanding he hath not yet had his Publick Audience, hath at his desire had Commissioners appointed to Treat with him, which it is thought, may be about the better settling of Trade between the two Nations. That the Velt Heer *Wrangle*, was not yet returned out of the several Counties, where he had been to take a view of the Kings Forces. From *Copenhagen*, that the men of War which had been equipped there this Summer, were in consideration of the approaching Season, ordered to be laid up again, and the rather, seeing the *Swedes* have upon the same score donè the like; so that they seem to have no farther occasion for the keeping them out any longer.

That the King hath directed the Velt Heer *Schaech* to go for *Furand*, *Holstein*, &c. to see that things be in a good condition there.

*Cologne*, September 8. On Monday last arrived here the Princess of *Lisbonne* from *Nancy*, where she hath hitherto continued, as is said, upon the hopes she had, that somewhat might ere this have been done for the restoring the Duke of *Lorraine*. We hear of some new Proposals which have been lately made to this Magistracy on the part of our Elector, consisting of ten points, about which they have since had several debates, but have not as yet returned any answer to them; though in the interim we are told, that they are not at all acceptable to the Town, the Elector by them demanding, what we have been possessed of for many years together, with other things, which our Magistrates have already declared they can never agree to.

About the beginning of the next week we expect here the Deputies from the Circle of *Westphalia*; in the interim the passages near this place are very unsafe for Travellers, by reason of some parties of *Lorrainers*, which our Elector hath lately taken into his Service, who for the present much infest our Roads. It is said, that our Elector is going to erect several Magazines for all kind of Military Provisions, in these parts, and that he likewise intends to fortify *Nuis*, as also some other places hereabouts.

The *Mareschal de Crequi* continues with his Forces in his old Station on the *Sarre*, and we are told, of more Forces which are to be joyned to those already under his Command.

*Hague*, September 10. The next week the States of *Holland* will be assembled again, the first Subject of their debate will be, the forbidding the importation of French Wines, &c. in which matter, though
