From Saturday September 22, to Tuesday September 25, 1750.

Tripoly, July 30.

THE Bashaw has ordered the Eight British Subjects, which were taken some Time since in a Danish Ship of 16 Guns, called the St. Antonio, John Sands, Master, to be delivered up to the British Vice-Consul at this Place, who embark'd them on the 5th of June last on Board a Pollacco for Mahon, in their Way to England.

Tangier, Aug. 17. The Sickness is now quite extinguished in both these Towns, it being upwards of a Month since any Symptom thereof has appeared. During the Time it lasted, according to the best Computation, it carried off about 3000 Persons, together with the Alcaide, and the British Vice-Consul; and out of 130 Jewish Families in this Town, but 15 Jews remain alive.

Algiers, Aug. 27. On the 22d past a French Vessel, with about Seventy Passengers on board, came to an Anchor in this Road from Tetuan, and a Report being immediately spread that the Plague was on board, the Dey gave Orders that no Person should come on Shore, and agreed with the French Consul that the said Vessel should perform a Quarantine of Forty Days; but as Mr. Keppel, the British Commodore, took it into Consideration, that as those People were absolutely ignorant of the Laws of Quarantine, and consequently had neither Regulations nor Officers adapted thereto, that there would be the greatest Danger of the Infection's being introduced by some rash Attempt or other of the Passengers, he therefore represented to the Dey, that the important Command his Britannick Majesty had entrusted him with, obliged him to remonstrate to his Highness, that he could by no Means think of staying one Moment in the Bay, unless that Vessel was ordered away immediately; upon which the Dey sent that Instant for the French Druggerman, and gave him Orders to send the Vessel away directly, which was done accordingly, not only to the British Commodore's, but to the Satisfaction of almost the whole City. On Friday the 27th past, about Ten at Night, the whole City was under the greatest Consternation, by the blowing up of one of the Castles, in which were, as 'tis said, about fifteen Barrels of Powder; but as the Castle stood upon a Hill above the Town,

and was built chiefly of Earth and Mortar, the City received no material Damage; but as for the Castle itself, nothing but the Ruins remain. Two or three contiguous Country Houses were thrown down, and about 20 People in all killed. The Cruizers of this Place did very little the last Cruize, having only taken a small Portuguese Vessel loaden with Salt; another with 124 Chests of Sugar; a Neapolitan with Sparta, whose Crew escaped in their Launch; and a small Vessel with Oil and Tunny Fish. They are now all out again. The annual Danish Ship, with Powder, Naval Stores, &c. is arrived, and 'tis said has brought all agreeable to Treaty.

Petersbourg, Sept. 7. The Fleet belonging to this Empire, having finished its Cruize, most of the Ships which composed it are gone into their different Ports, in order to be laid up. There is arrived at Cronstadt, a new Ship of War, built at Archangel, and named the City of Moscow; and 'tis said there are several others building in the said Port, which will be ready to launch next Spring.

Naples, Sept. 8. The two Galliot, which the Court lately ordered to be stationed on the Coast of Calabria, in order to hinder the clandestine Trade which has, for a long Time past, been carried on there, have already taken several Barques loaden with contraband Goods; but the Orders they received not to go off the Coast, has prevented their giving Chace to some Corsairs which are cruizing in those Parts, and very much interrupt the Commerce.

Rome, Sept. 12. The Pope has assigned a Pension for the Bishop of Volterre, who has been for some Time confined in the Castle of St. Angelo, and given him Leave to walk about the City; but 'tis said that Prelate has excused himself from accepting of either of those Favours. Since the publick Notice that was given for the bringing to the Secretary of State's Office, Samples of Oil and Olives, in order to contract for supplying the Inhabitants of this City with the same for a certain Number of Years, many Dealers in those Commodities have given in their Proposals, but as yet that Affair is undetermined. A few Days ago the Prince of Caserta received Advice, that the great Forest of Caserta was entirely destroyed by Fire, but that no one could tell how it happened.

Genoa, Sept. 12. General Pallavicini, who has been here for this Fortnight past, is on his Departure for Milan, in order to take Possession of

[Price Two-pence.]
