

The London Gazette.

Published by Authority.

From Saturday September 21, to Tuesday September 24, 1751.

Naples, Sept. 3.

ON the 26th past, their Majesties, attended by their Retinue, set out for Caserta, to take the Diversion of Shooting, and returned the same Evening to this City. The new Frigate of War of 36 Guns, which was launched from the Stocks in the Presence of their Majesties on Saturday last, is named the Notre Dame de la Conception, and is reputed to be a complete Ship. She was built by Direction of a Person in the Secretary of State's Office, whom the King has ordered to inspect the Building of two new Shebecks.

Rome, Sept. 7. On the 27th past M. Figaro had an Audience of the Pope, relating to the Affairs of the Archbishoprick of Toledo. On the 30th the Equipage of Cardinal Portocarrero departed for Parma, for which Place his Eminence proposes to take a Journey. On the 1st Instant departed for Civita Vecchia, the Sister-in-Law of the French Ambassador, to embark on board one of the Pope's Gallies for Marseilles.

Modena, Sept. 6. M. Sabbatina, Bishop of this City, has caused publick Prayers to be put up in all our Churches, to employ the Almighty to send us Rain: He has likewise published a Pastoral Letter on the same Occasion; and great Reason there was for it, as the excessive Heats we have had for a long Time past, have caused such a prodigious Drought, that all the Grass has been in a Manner quite burnt up, by which Misfortune the Cattle have suffered very much. Their Serene Highnesses the Prince and Princess our Sovereigns are still at Massa, where 'tis said they will remain till the 12th or 15th Instant.

Turin, Sept. 7. Count Bogia, Secretary at War, is shortly to set out for Milan, in order to terminate, in an amicable Manner, with Count Christiani, whom the Queen of Hungary has appointed for that Purpose, the Differences which have subsisted between this Court and that of Vienna, in Relation to several Demands the Empress Queen has upon the Countries ceded to his Majesty by the Treaty of Aix-la-Chapelle.

Petersbourg, Sept. 7. We have received Advice from Cronstadt, that the Fleet which was equipping in that Port, were all disarmed, agreeable to the Empress's Orders. Last Sunday Evening her Imperial Majesty arrived here

from Peterhoff, and was saluted at her Entrance into this City by a general Discharge of the Cannon of the Fortress and of those of the Admiralty.

Florence, Sept. 10. All Difficulties being removed with Regard to the Building the Suburbs to the City of Leghorne, an Edict was published by the Regency on the 6th Instant, allowing certain Privileges and Exemptions to such Persons and Families as should build Houses, and establish themselves there. The Commerce of Leghorne is greatly alarmed by the frequent Captures which the Barbary Pirates make in Sight of that Port, to the infinite Prejudice of the Trade of it.

Prague, Sept. 13. The Troops which form'd the Camps of Collin and Pilsen began to march this Morning for their respective Quarters. The Regiment of Archduke Charles, and those of Konigsegg, Wolfenbuttel and Philibert, are expected here in Garrison To-morrow and the Day after. Prince Piccolomini commands in Chief the Troops quartered in this Kingdom till the Arrival of Count Brown, whom the Empress Queen has lately appointed to that Command. Prince Lobkowitz set out from hence this Morning for Vienna, from whence he will proceed to his Post in Hungary.

Vienna, Sept. 15. On Sunday last, being the Anniversary of the Turks raising the Siege of this City in the Year 1683, the same was observed as usual. On this Occasion a solemn Procession was made to the Metropolitan Church, at which the Empress Queen, who came purposely from Schonbrun, assisted; after which Te Deum was sung to Musick, and a triple Discharge was made of the Cannon upon our Ramparts. On Friday last a long Conference was held at the Palace upon the Affairs of the Empire, and the next Morning Count Colloredo, Vice Chancellor, went to Hollitsch, to communicate the Result of it to the Emperor, whose Return from thence to Schonbrun is fixed for Saturday next. 'Tis now the general Opinion that Prince Charles of Lorraine will not set out from hence for his Government of the Low Countries till towards the 20th of next Month. Yesterday Prince Lobkowitz, who arrived here on Monday last from Prague, was admitted to an Audience of the Empress Queen at Schonbrun, and next Week he proposes setting out for Hungary, in order to take upon him the Command of the Imperial Troops in that Kingdom.

Genda,
