Constantinople, June 16.

THE Disgrace of the Mufti has followed that of the late Grand Vizier. Every Thing is now quiet in this City; neither do we perceive the least Appearance of any contagious Distemper, which generally used to rage about this Time of the Year.

Madrid, June 24. We have received Advice, that several Fathers of the Order of the Trinitarians arrived on the 10th and 12th Instant at Carthagená from Algiers, with 325 Christian Slaves, whom they had lately redeemed.

Genoa, June 28. On the 21st Instant a new Galley was launched in this Arsenal, which had been contracted for, for his Sardinian Majesty's Service. As soon as she was a float, the Officers, who came on Purpose from Villafranca, with Slaves, Seamen and others, took Possession of her, and having fitted her out, she departed last Night for Villafranca. On the 26th at Night, two of this Republic's Gallies sailed for Calvi, having on board Seven Companies of Soldiers to change the Garrison of that Place and Ajaccio. The new Road that is making from Sestri di Levante into the State of Parma, is carried on with the greatest Diligence, and it is said will be completed this Summer. The Preparations for Building a Castle at St. Remo, are carried on with Vigour: Large Quantities of Materials have been sent thither, and they have begun to drive the Piles for the Foundation, having erased an old Church that stood on the Ground where the Castle is to be built. Letters from Bastia of the 21st Instant advise, that a Resolution had been taken in the late General Assembly of the Malecontents, to appropriate all the Fruits and Tents belonging to the Bishops and Canons of the Island, to enable them to oppose the Republic; that several other Malecontents were returned to the Island to join their Partizans, and had industriously spread a Report, of having brought with them a Supply of 24000 Livres. The Malecontents have burnt and destroyed the Fattoria called the Procoia in Fiumorbo, belonging to the Families of Fieschi and Spinola of this City; and their Agent, with his Family, has been obliged to take Refuge in Bastia.

Rome, June 28. On the 18th Instant Cardinal Besozzi died at Tivoli, after a lingering Illness; by whose Death there are ten vacant Hats in the College of Cardinals, including that which the Pope reserved *in petto* at the last Promotion. By the last Letters from Ancona we

have received the disagreeable News, that they had felt a terrible Shock of an Earthquake, which had occasioned considerable Damage. On the 24th the Margrave and Margravine of Bareith, went to see the Country Seat of Cardinal Valenti, and were splendidly entertained there by his Order. On the 26th the Pope, attended by his Retinue and Guards, returned to this City from Castle Gandolfo, and the Eve of the Festival of St. Peter received the Hackney, as a Tribute for the Kingdom of Naples; which Ceremony was as usual performed by the Constable Colonna.

On the 30th Count Richcourt set out for Siena, in Company with M. Martini, the Pope's Inter-Nuncio, to establish the Tribunal of the Inquisition, upon the same Foot as had been done at Florence, Pisa, &c.
