### 1 ACCOUNTING POLICIES

#### Accounting convention

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2005) under the historical cost convention.

#### **Tangible fixed assets**

Depreciation is provided on cost in equal annual instalments over the estimated useful lives of the assets. The rates of depreciation are as follows:

Office furniture & fittings 10% to 25% per annum
Office equipment 25% to 50% per annum
Computer equipment 10% to 25% per annum

#### Taxation

Current tax is provided at amounts expected to be paid using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax, in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured at the average rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date

Deferred tax is measured on a non discounted basis

#### Leases

Assets obtained under finance leases and hire purchase contracts are capitalised at their fair value on acquisition and depreciated over their estimated useful lives. The capital elements of future lease and hire purchase obligations are recorded as liabilities, while interest elements are charged to the profit and loss account over the period of the contracts to produce a constant rate of charge on the balance of capital repayments outstanding. Hire purchase transactions are dealt with similarly, except that assets are depreciated over their useful lives.

Rentals under operating leases are charged on a straight-line basis over the lease term, even if the payments are not made on such a basis. Benefits received and receivable as an incentive to sign an operating lease are similarly spread on a straight line basis over the lease term, except where the period to the review date on which the rent is first expected to be adjusted to the prevailing market rate is shorter to the full lease term, in which case the shorter period is used

#### Pension costs

The company operates a defined contribution pension scheme. Contributions are charged to the profit and loss account in the period to which they relate
